CITY OF DENTON, TEXAS

STANDARD AGREEMENT FOR ENGINEERING RELATED PROFESSIONAL SERVICES

This AGREEMENT is between the City of Denton, a Texas home-rule municipality ("CITY"), and Kimley-Horn and Associates, Inc., with its corporate office at 421 Fayetteville Street, Suite 600, Raleigh, NC 27601 and authorized to do business in Texas, ("ENGINEER"), for a PROJECT generally described as: Aquatics Master Plan (the "PROJECT").

SECTION 1 **Scope of Services**

- A.** The CITY hereby agrees to retain the ENGINEER, and the ENGINEER hereby agrees to perform, professional engineering services set forth in the Scope of Services attached hereto as Attachment A. These services shall be performed in connection with the PROJECT.
- B.** Additional services, if any, will be requested in writing by the CITY. CITY shall not pay for any work performed by ENGINEER or its consultants, subcontractors and/or suppliers that has not been ordered in advance and in writing. It is specifically agreed that ENGINEER shall not be compensated for any additional work resulting from oral orders of any person.

SECTION 2 **Compensation and Term of Agreement**

- A.** The ENGINEER shall be compensated for all services provided pursuant to this AGREEMENT in an amount not to exceed \$80,000 in the manner and in accordance with the fee schedule as set forth in Attachment A. Payment shall be considered full compensation for all labor, materials, supplies, and equipment necessary to complete the services described in Attachment A.
- B.** Unless otherwise terminated pursuant to Section 6. D. herein, this AGREEMENT shall be for a term beginning upon the effective date, as described below, and shall continue for a period which may reasonably be required for the completion of the PROJECT, until the expiration of the funds, or completion of the PROJECT and acceptance by the CITY, whichever occurs first. ENGINEER shall proceed diligently with the PROJECT to completion as described in the PROJECT schedule as set forth in Attachment A.

SECTION 3 **Terms of Payment**

Payments to the ENGINEER will be made as follows:

A. Invoice and Payment

- (1) The Engineer shall provide the City sufficient documentation, including but not limited to meeting the requirements set forth in the PROJECT schedule as set forth in Attachment A to reasonably substantiate the invoices.
- (2) The ENGINEER will issue monthly invoices for all work performed under this AGREEMENT. Invoices for the uncontested performance of the particular services are due and payable within 30 days of receipt by City.
- (3) Upon completion of services enumerated in Section 1, the final payment of any balance for the uncontested performance of the services will be due within 30 days of receipt of the final invoice.
- (4) In the event of a disputed or contested billing, only that portion so contested will be withheld from payment, and the undisputed portion will be paid. The CITY will exercise reasonableness in contesting any bill or portion thereof. No interest will accrue on any contested portion of the billing until mutually resolved.
- (5) If the CITY fails to make payment in full to ENGINEER for billings contested in good faith within 60 days of the amount due, the ENGINEER may, after giving 7 days' written notice to CITY, suspend services under this AGREEMENT until paid in full. In the event of suspension of services, the ENGINEER shall have no liability to CITY for delays or damages caused the CITY because of such suspension of services.

SECTION 4 Obligations of the Engineer

A. General

The ENGINEER will serve as the CITY's professional engineering representative under this AGREEMENT, providing professional engineering consultation and advice and furnishing customary services incidental thereto.

B. Standard of Care

The ENGINEER shall perform its services:

- (1) with the professional skill and care ordinarily provided by competent engineers practicing in the same or similar locality and under the same or similar circumstances and professional license; and
- (2) as expeditiously as is prudent considering the ordinary professional skill and

care of a competent engineer.

C. Subsurface Investigations

- (1) The ENGINEER shall advise the CITY with regard to the necessity for subcontract work such as special surveys, tests, test borings, or other subsurface investigations in connection with design and engineering work to be performed hereunder. The ENGINEER shall also advise the CITY concerning the results of same. Such surveys, tests, and investigations shall be furnished by the CITY, unless otherwise specified in Attachment A.
- (2) In soils, foundation, groundwater, and other subsurface investigations, the actual characteristics may vary significantly between successive test points and sample intervals and at locations other than where observations, exploration, and investigations have been made. Because of the inherent uncertainties in subsurface evaluations, changed or unanticipated underground conditions may occur that could affect the total PROJECT cost and/or execution. These conditions and cost/execution effects are not the responsibility of the ENGINEER.

D. Preparation of Engineering Drawings

The ENGINEER will provide to the CITY the original drawings of all plans in ink on reproducible mylar sheets and electronic files in .pdf format, or as otherwise approved by CITY, which shall become the property of the CITY. CITY may use such drawings in any manner it desires; provided, however, that the ENGINEER shall not be liable for the use of such drawings for any project other than the PROJECT described herein.

E. Engineer's Personnel at Construction Site

- (1) The presence or duties of the ENGINEER's personnel at a construction site, whether as on-site representatives or otherwise, do not make the ENGINEER or its personnel in any way responsible for those duties that belong to the CITY and/or the CITY's construction contractors or other entities, and do not relieve the construction contractors or any other entity of their obligations, duties, and responsibilities, including, but not limited to, all construction methods, means, techniques, sequences, and procedures necessary for coordinating and completing all portions of the construction work in accordance with the AGREEMENT Documents and any health or safety precautions required by such construction work. The ENGINEER and its personnel have no authority to exercise any control over any construction contractor or other entity or their employees in connection with their work or any health or safety precautions.
- (2) Except to the extent of specific site visits expressly detailed and set forth in Attachment A, the ENGINEER or its personnel shall have no obligation or

responsibility to visit the construction site to become familiar with the progress or quality of the completed work on the PROJECT or to determine, in general, if the work on the PROJECT is being performed in a manner indicating that the PROJECT, when completed, will be in accordance with the AGREEMENT Documents, nor shall anything in the AGREEMENT Documents or this AGREEMENT between CITY and ENGINEER be construed as requiring ENGINEER to make exhaustive or continuous on-site inspections to discover latent defects in the work or otherwise check the quality or quantity of the work on the PROJECT. If the ENGINEER makes on-site observation(s) of a deviation from the AGREEMENT Documents, the ENGINEER shall inform the CITY.

- (3) When professional certification of performance or characteristics of materials, systems or equipment is reasonably required to perform the services set forth in the Scope of Services, the ENGINEER shall be entitled to rely upon such certification to establish materials, systems or equipment and performance criteria to be required in the AGREEMENT Documents.

F. Opinions of Probable Cost, Financial Considerations, and Schedules

- (1) The ENGINEER shall provide opinions of probable costs based on the current available information at the time of preparation, in accordance with Attachment A.
- (2) In providing opinions of cost, financial analyses, economic feasibility projections, and schedules for the PROJECT, the ENGINEER has no control over cost or price of labor and materials; unknown or latent conditions of existing equipment or structures that may affect operation or maintenance costs; competitive bidding procedures and market conditions; time or quality of performance by third parties; quality, type, management, or direction of operating personnel; and other economic and operational factors that may materially affect the ultimate PROJECT cost or schedule. Therefore, the ENGINEER makes no warranty that the CITY's actual PROJECT costs, financial aspects, economic feasibility, or schedules will not vary from the ENGINEER's opinions, analyses, projections, or estimates.

G. Construction Progress Payments

Recommendations by the ENGINEER to the CITY for periodic construction progress payments to the construction contractor will be based on the ENGINEER's knowledge, information, and belief from selective sampling and observation that the work has progressed to the point indicated. Such recommendations do not represent that continuous or detailed examinations have been made by the ENGINEER to ascertain that the construction contractor has completed the work in exact accordance with the AGREEMENT Documents; that the final work will be acceptable in all respects; that the

ENGINEER has made an examination to ascertain how or for what purpose the construction contractor has used the moneys paid; that title to any of the work, materials, or equipment has passed to the CITY free and clear of liens, claims, security interests, or encumbrances; or that there are not other matters at issue between the CITY and the construction contractor that affect the amount that should be paid.

H. Record Drawings

Record drawings, if required, will be prepared, in part, on the basis of information compiled and furnished by others, and may not always represent the exact location, type of various components, or exact manner in which the PROJECT was finally constructed. The ENGINEER is not responsible for any errors or omissions in the information from others that is incorporated into the record drawings.

I. Right to Audit

- (1) ENGINEER agrees that the CITY shall, until the expiration of five (5) years after final payment under this AGREEMENT, have access to and the right to examine and photocopy any directly pertinent books, documents, papers and records of the ENGINEER involving transactions relating to this AGREEMENT. ENGINEER agrees that the CITY shall have access during normal working hours to all necessary ENGINEER facilities and shall be provided adequate and appropriate work space in order to conduct audits in compliance with the provisions of this section. The CITY shall give ENGINEER reasonable advance notice of intended audits.
- (2) ENGINEER further agrees to include in all its subconsultant agreements hereunder a provision to the effect that the subconsultant agrees that the CITY shall, until the expiration of five (5) years after final payment under the subcontract, have access to and the right to examine and photocopy any directly pertinent books, documents, papers and records of such subconsultant, involving transactions to the subcontract, and further, that the CITY shall have access during normal working hours to all subconsultant facilities, and shall be provided adequate and appropriate work space, in order to conduct audits in compliance with the provisions of this section together with subsection (3) hereof. CITY shall give subconsultant reasonable advance notice of intended audits.

N. Permitting Authorities - Design Changes

If permitting authorities require design changes so as to comply with published design criteria and/or current engineering practice standards which the ENGINEER should have been aware of at the time this AGREEMENT was executed, the ENGINEER shall revise plans and specifications, as required, at its own cost and expense. However, if design changes are required due to the changes in the permitting authorities' published design criteria and/or practice standards criteria which are published after the date of this AGREEMENT which the ENGINEER could not have been reasonably aware of, the ENGINEER shall notify the CITY of such changes and an adjustment in compensation will be made through an amendment to this AGREEMENT.

Re: City of Denton – Aquatics Master Plan Services

Dear Mr. Escoto:

Kimley-Horn and Associates, Inc. (“Kimley-Horn” or “Consultant”) is pleased to submit this letter agreement (the “Agreement”) to The City of Denton (“Client” or “City”) for providing an Aquatics Master Plan.

Project Understanding

The City intends to enter an Agreement with Kimley-Horn to provide a community driven needs assessment of the Aquatic operation culminating to an Aquatics Master Plan. Denton has three outdoor aquatic facilities: the Water Works Park (WWP), Civic Center Pool (CCP), and the Carl Gene Young Sr. Sprayground. The City also shares the Denton Natatorium with the Denton Independent School District (DISD).

Scope of Services

Kimley-Horn will provide the services specifically set forth below.

Task 1 Data Collection

Prior to beginning this task, the City will furnish the Consultant any existing information on the site including topographic surveys, geo-technical reports, as-built plans, data and maps from prior master plans, and plat with utility easements and locations shown. This task includes a one-day in-person visit from the Consultant and team members. The City will also provide the Consultant with existing funding sources and operational data.

1.1 Initial Communication and Coordination

Prior to and during this task the Consultant will finalize timelines with the City, set up communication protocol, hold a project kick-off meeting, and establish procedures for providing project status reports on a bi-monthly basis.

1.2 Facility Visit

The Consultant will need to become familiar with the location, condition, and programming offered at all existing aquatic facilities (City of Denton, University of North Texas and Texas Women’s University). The basic approach to this task will consist of the following:

- A. Prior to visiting the pools – the City will provide the Consultant any existing information on

- the pools including age, known condition issues, chemical usage, recent renovations, current operating costs, attendance, and revenue.
- B. The Consultant will visit the three outdoor aquatic facilities (WWP, CCP and Carl Gene Young Sr. Sprayground) and perform a general evaluation of the condition of the facility. The facilities will be photographed and information about condition and operational issues will be documented in the form of descriptive meeting notes.
 - C. Overview comments will be developed and submitted regarding support spaces, parking, ADA compliance, and other site issues.
 - D. The deliverable will consist of a one-to-two-page report for each location noting the type of pool, program elements, systems, condition issues, and opinion of contribution of the facility to the overall city-wide aquatic program.

1.3 Research and Compile Demographics

The Consultant will conduct research and compile demographic information, including population, age distribution, income, weather analysis and economic considerations that could affect the future viability of the aquatic facilities.

1.4 Aquatic Area Providers Study

The Consultant will study other area aquatic providers to better understand the aquatic services and facilities that are provided in the region and the fees that are being charged for those services. This information will also be used as a benchmark when comparing the services offered by the City's aquatic facilities as opposed to the similar area providers.

1.5 Meetings

Meetings will include a one-day site visit from the Consultant and a follow up internet meeting to review and discuss findings with the City. The City's project manager and aquatics manager will attend meetings and site visits with the Consultant.

Task 2 Goals, Objectives, Public Meetings

2.1 Community Workshops and Local Community Stakeholder Input

The City will lead community workshops to analyze needs and determine objectives. The Consultant will provide the City with a presentation that will include images and/or video presentations with commentary on the existing pools and features of other aquatic centers that could be considered for this project; background information on historic and contemporary issues in the industry; and an open-forum question-and-answer session to discuss concerns and needs of those individuals and groups attending the meeting.

The Consultant will coordinate with local community stakeholders including Denton ISD, University of North Texas Representatives and Texas Women's University to identify consistency and shared interest.

A matrix of programming priorities will be developed and discussed to prioritize programming and facility features. The Consultant will use the results of the interviews and public workshop to develop a needs profile.

2.2 SWOT Analysis

The Consultant will meet with the City Staff and individuals involved in the project to complete a **S**trengths **W**eakness **O**pportunities and **T**hreats (SWOT) analysis of existing amenities and programs.

2.3 Programming

Based upon the findings, a program for the proposed aquatic facility modifications will be developed from the community meetings, City aquatic staff, facilitated focus groups, and interviews. The program will reflect the desires submitted by these groups.

2.4 Meetings

The Consultant will attend three (3) in-person City staff led public meetings and up to three (3) internet meetings during this task.

Task 3 Conceptual Designs and Prioritization

3.1 Conceptual Designs

The Consultant will provide a generic conceptual plan of each aquatic facility identified through the needs analysis and programming. The plan will illustrate ways to organize the spaces in a functional arrangement and confirm that the facility footprint will contain the areas proposed in the design program. Concepts with varying space requirements will be identified along with budgeting considerations. Based on results of the meetings and programming sessions – conceptual plans will be developed that could address:

- A. Spray grounds or splash pad additions.
- B. Swimming pool additions for competition, practice, leisure or therapeutic uses
- C. Waterslides, Spray/Play Features, Lazy Rivers
- D. Shade Structures
- E. General layouts of support areas (Locker Rooms, Meeting Room, Office Area and Pool Mechanical Areas) will be considered as part of the overall concept. Conceptual design of the support areas will not be included.

An Opinion of Probable Cost will be developed for the concept plan. Because the Consultant does not control the cost of labor, materials, equipment, or services furnished by others, methods of determining prices, or competitive bidding or market conditions, any opinions rendered as to costs, including but not limited to opinions as to the costs of construction and materials, shall be made on the basis of its experience and represent its judgment as an experienced and qualified professional, familiar with the industry. The Consultant cannot and does not guarantee that proposals, bids, or actual costs will not vary from its opinions of cost.

3.2 Prioritization Plan

Using the concept plans and Opinion of Probable Costs, the Consultant will discuss prioritization plans for infrastructure and capital improvement projects with the City. Scenarios will offer solutions regarding additions or modifications based on needs with the goal of providing the needed services at a more sustainable operations cost.

3.3 Meetings

The Consultant will attend up to three (3) internet meetings during this task.

Task 4 Economic and Operational Impact Study (Optional)

4.1 Economic Impact Study

Based upon any final public and Client comments - the Consultant will finalize the analysis of the economic impact of the facilities to the Parks and Recreation Department. In this segment of the study the following will be researched, analyzed, and reported:

- A. Demographic research will be completed to appropriately evaluate the proposed facilities. Analysis will include population and age distribution, income, weather analysis, and local economic considerations that could affect the project's viability.
- B. An opinion of probable expenses will be developed and it will include demands on labor, contract services, supplies, utilities, maintenance, and funds needed for future repair.
- C. An opinion of revenue will be developed. Market area demographics for population, age, and income will be analyzed to understand the economics of the region and the level of discretionary income that may be used for leisure and competitive aquatic activity.
- D. Revenue projections will be derived from the likely market penetration, special user groups through creative programming, and the potential of income. The analysis will include a commentary on the influence of the tourism. This analysis will incorporate an opinion of attendance and offer recommendations of a competitive fee structure for all facilities.

4.2 Operational Impact

Based upon any final public and City comments - the Consultant will finalize the analysis of the operational impact of the facility to the Parks and Recreation Department. In this segment of the study the following will be researched, analyzed, and reported:

- A. A facility management outline will be completed that includes a facility operating schedule, facility capacity limits, organization chart, job descriptions, and a wage structure for all employees.
- B. Area aquatic user groups will be identified to determine organizations that will contribute to filling available capacity in the facility.
- C. A marketing program will be prepared to aid in creatively promoting the proposed projects once the project is completed.

Task 5 Final Report & Presentation

5.1 Finalize the Plans and Opinions of Probable Cost

The Consultant will finalize the report and presentation for the master plan.

5.2 Deliverables

Deliverables will consist of one (1) digital copy of the plan document and presentations. The master plan report will include professionally written text and graphic exhibits documenting methodology, implementation scenarios, meeting notes, program elements, final conceptual designs for each proposed location, and opinions of probable cost.
