ANNUAL COMPREHENSIVE FINANCIAL REPORT

Fiscal Year Ending Sept. 30, 2021

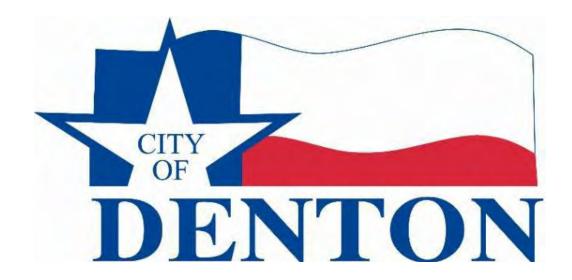

TRANSPARENCY

VISION

"Destination Denton"

Denton is an identifiable and memorable destination and a community of opportunities. We achieve this by providing high quality of life through excellence in education, entertainment, and employment; neighborhood vitality and sustainability; environmental and financial stewardship; and superior public facilities and services.

MISSION

"Dedicated to Quality Service"

The City of Denton will foster an environment that will deliver extraordinary quality service and products through stakeholder, peer group, and citizen collaboration; leadership and innovation; and sustainable and efficient use of resources.

VALUES

"We Care"

We care about our people, our community, and our work. We do this with integrity, respect, and fairness.

CORE VALUES

INTEGRITY

Making sure that with every decision we make, our actions match our values.

FISCAL RESPONSIBILITY

Ensuring that people can trust that we use public funds conscientiously, with the community's best interest in mind.

INCLUSION

Creating a culture where all people feel a sense of belonging and support by valuing each other and our differences

TRANSPARENCY

Building an environment of trust by interacting with others honestly as well as collecting and sharing clear and concise information.

OUTSTANDING CUSTOMER SERVICE

Employing a holistic approach to problem-solving and providing responsive service that goes above and beyond expectations.

215 E. McKinney St., Denton, TX 76201 • (940) 349-8531

March 30, 2022

The Honorable Mayor and Members of the City Council City of Denton Denton, Texas

It is with great pleasure that we present to you a copy of the Annual Comprehensive Financial Report (ACFR) of the City of Denton (the City) for the fiscal year ended September 30, 2021. The purpose of the report is to provide the City Council, management, citizens, and other interested parties with detailed information concerning the City's financial condition.

THE REPORT

The Texas Local Government Code (§ 103.001) requires an annual audit for municipalities. In addition, the City Charter (Section 2.13) requires a Certified Public Accountant who, as of the end of the fiscal year, shall make an "independent audit of accounts" and prepare a report to the City Council and the City Manager. This document fulfills the above-mentioned requirements, and the independent auditor's opinion is included in the report for the fiscal year ended September 30, 2021.

The ACFR is presented in three main sections: Introductory, Financial, and Statistical. The Introductory Section includes this transmittal letter, the City's organizational chart, and a list of principal officials. The Financial Section includes the Management's Discussion and Analysis (MD&A), Basic Financial Statements, Required Supplementary Information, Combining and Individual Fund Financial Statements, along with the independent auditors' report. The Statistical Section and Other Supplementary Information include selected financial and demographic information, generally presented on a multi-year basis.

The responsibility for both the accuracy of the presented information and the completeness and fairness of the presentation of the data, including all disclosures, rests with the City, and is based upon a comprehensive framework of internal control established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance the financial statements are free of any material misstatements. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to fairly present the results of our operations in each of the various funds reported by the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

The accounting firm of Weaver and Tidwell, LLP. has issued an unmodified opinion on the City of Denton's financial statements for the period ended September 30, 2021. As a recipient of federal and state grant awards, a separate audit is prepared to meet the requirements of the Single Audit Act Amendments of 1996 and related Uniform Guidance. As a part of the City's single audit, tests are conducted to determine that the City has complied with applicable laws and regulations related to federal awards.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditors' report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

PROFILE OF THE GOVERNMENT

Originally incorporated on September 26, 1866, the City of Denton is now 98.818 square miles and has an estimated population of 143,573. The City is a home rule city and operates under the Council-Manager form of government. The elected seven-member council consists of a Mayor and six Council Members. The Mayor and two Council Members are elected at large, while the remaining representatives are elected from single member

OUR CORE VALUES

Integrity • Fiscal Responsibility • Inclusion • Transparency • Outstanding Customer Service

districts. The City Council enacts local laws, determines policy, and adopts the annual budget, and the City Manager is the chief executive officer for the City.

The City of Denton is in the northern portion of the Dallas/Fort Worth Consolidated Metropolitan Statistical Area (CMSA). The City is a part of the Dallas/Fort Worth Metroplex and is situated at the apex of a triangle based by Dallas (37 miles to the southeast) and Fort Worth (35 miles to the southwest) providing excellent access to and from all parts of the area.

The City provides a full range of general government services to its citizens including: public safety (police and fire protection); public works (construction and maintenance of highways, streets and infrastructure); parks and recreation; library; planning and zoning; economic development; and general administrative services. The City's enterprise fund operations consist of a utility system, solid waste, and airport operations. The City's utility system provides electric, water, and wastewater services.

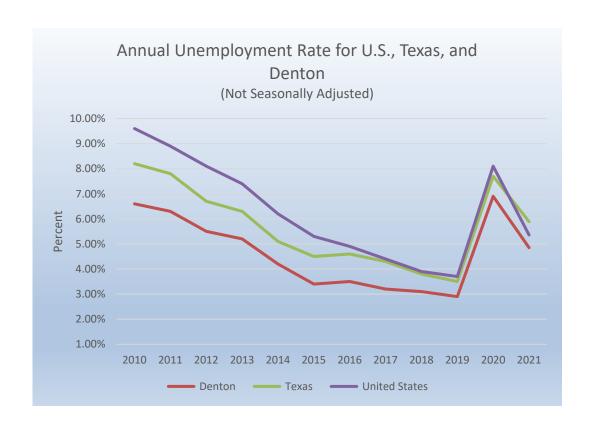

The internal service operations consist of the Materials Management, Fleet Services, Risk Retention, Health Insurance, Engineering Services, Technology Services, Customer Service, and Facilities funds. The Materials Management Fund accounts for the financing of Warehouse and Purchasing services which are provided to other City departments. The Fleet Services Fund accounts for the financing of goods and services provided by the municipal garage to other departments within the City. The Risk Retention Fund accounts for the accumulation of resources for the payment of workers' compensation, general liability claims, and insurance policies. The Health Insurance Fund accounts for administration of the self-insurance program for health coverage in the City. The Engineering Services Fund accounts for the provision of internal engineering services to various City operations and capital projects. The Technology Services Fund provides support for the various information and computer systems within the City. The Customer Service Fund accounts for the financing of customer service activities provided to the residents and businesses of the City on behalf of other departments within the City. The Facilities Management Fund is responsible for maintaining all city-owned facilities and vertical construction projects. The financial statements presented include all government activities, organizations, and functions for which the City is financially accountable as defined by the Governmental Accounting Standards Board (GASB).

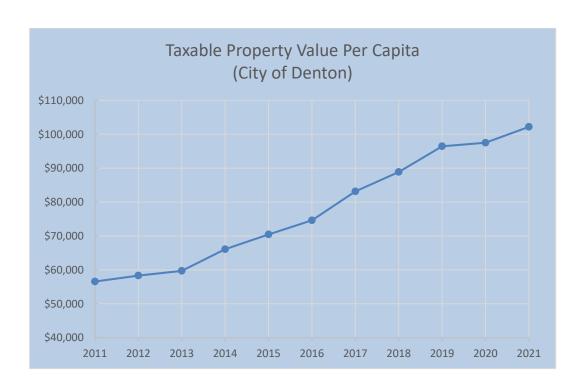

LOCAL ECONOMY

Fiscal year 2020-21, with the challenges the pandemic and variants brought, a new normalcy has set in, the city of Denton has continued to grow with a tax base average growth of 8.48% over the last 10 years. Recently, the City's tax base grew by 11.92% in FY 2019-20, 4.39% in FY 2020-21, and 7.88% in FY 2021-22. After property tax revenues, the second largest source of revenue in the General Fund is sales tax. Representing approximately 27.2% of overall revenue in the General Fund, sales tax is a significant revenue source that is dependent upon a variety of economic factors. For FY 2020-21, total sales tax revenues equaled \$45,404,857 which is \$6,067,023 or 15.4%, more than the prior year collections of \$39,337,834.

The City of Denton's net seasonally adjusted annual unemployment average rate remains below state and national levels at an average 4.9 percent in 2021 which has decreased significantly compared to 6.9 average of FY2019-2020. Excluding City building, County buildings, schools, and churches, the City of Denton issued 18771 residential and commercial building permits for FY2019-20, with an estimated value of \$795 million. This compares to a total of 1,601 commercial and residential permits issued for FY2019-20 and an estimated value of \$700 million. The overall permit numbers were up due to a increase in single family housing.

The following two charts highlight the strength of the local economy over the last ten years by displaying the City of Denton's unemployment rate compared to Texas and the United States and the taxable property values per capita in the City of Denton.

Fiscal year 2021-22 the City continued to see indicators of a strong economy that adjusted to and remained stable throughout the pandemic. Listed below are just a few of the highlights:

- The Rayzor Ranch mixed-use development is located on both the north and south sides of US Highway 380 in Denton. Rayzor Ranch Marketplace, on the north side of the development, has constructed over 500,000 square feet of retail and commercial space. Sam's Club and Wal-Mart anchor the development that will soon include Ulta Beauty. The Town Center also includes the Embassy Suites Hotel and Convention Center described in more detail below. In addition, a new 300-unit multifamily project, the Village at Rayzor Ranch, opened in late 2019, and construction began in 2020 and opened in 2021, on the Residences at Rayzor Ranch, a 40-acre site that will include 215 town homes and 65 single family homes and 31 single-family homes. Growler Bar and Taqueria Monterrey are new restaurant tenants at the Town Center.
- O'Reilly Hotel Partners Denton (OHPD) opened the 70,000-square-foot Convention Center, 318-room LEED Gold Certified Embassy Suites Hotel, and Houlihan's restaurant project in January 2018. The property was designated as a "2019 AAA Inspector's Best of Housekeeping Hotel," which ranks the hotel in the top 25% of 27,000 inspected hotels. In 2019, Hilton Worldwide recognized the Embassy Suites Denton Hotel and Convention Center as the #1 in Brand 2019 Connie Award winner, the highest distinction across all 17 Hilton Worldwide brands and the 258 eligible properties. As a major anchor for the Rayzor Ranch Town Center, the project capitalizes on the shopping, entertainment, and restaurants located nearby. The privately managed convention center is also expected to expand the City's convention business and overall tourism industry.
- The City's Fire Station 8, opened in February of 2021 near the Medical City Denton, which has been six years in the making. The facility is approximately 8,500 square feet, which provides quick response to emergencies around Denton's southeastern medical corridor.
- Denton continued to see positive growth in the tech industry in FY 2021-21. Denton's coworking space and entrepreneur center, Stoke Denton, celebrated their 5-year Anniversary and continue to serve as a training and mentorship hub throughout the pandemic. Stoke and Texas Woman's University (TWU) Center for Women Entrepreneurs (CWE) launched an incubator program, AccelerateHER. Two rounds of grant funding were conducted. In September, seven women entrepreneurs were accepted into the program. Eighty-three events were hosted by Stoke in 2021. In addition, Denton initiated its first ever tech/entrepreneurship grant in 2021, with the local company detailed below:
 - ➤ Team of Defenders Team of Defenders is an IT platform company established in 2018. They currently operate out of Stoke and estimate that they will hire 56 tech employees with a payroll of \$7M in the next ten years.
- A number of projects, which will total over 3 million square feet, are currently underway in the Westpark Tax Increment Reinvestment Zone (TIRZ) in the largest industrially zoned area within the City.
 - Ironwood Realty Partners and Scannell Properties have partnered on an industrial project, Denton Crossing @ I-35, which will house approximately 1.2 million square feet of industrial speculative space along Western Boulevard. There will be a total of four buildings upon completion. Buildings 1 and 2 are underway with just under 700,000 square feet. Buildings 3 is currently under construction and will comprise up to 398,000. Building 4 has been constructed and has 127,000 square feet of warehouse space. Elite Materials Logistics plans to occupy a building in phase 2 of the development.
 - Exeter has completed a building comprising 649,000 square feet, where W. Oak Street and Jim Christal meet, that will be the newest distribution center for Lowe's Home Improvement. Exeter is also constructing three buildings at the northeast corner of Western Blvd. and Jim Christal. The square footage of these buildings are 324,000 square feet, 421,000 square feet, and 1,076,000 square feet
 - ➤ Hunt Southwest is developing 23-acre site on S. Western Boulevard at Jim Christal Road at the I-35 Convergence. It is planned to have 250,000 square feet of warehouse space with a proposed build-to-suit on seven of the acres, for a 227,420 square foot building.
 - ➤ Westpark Industrial, a 16-acre parcel, will include two speculative buildings at just over 100,000 square feet each.

➤ Denton Point is comprised of two buildings totaling 242,320 square feet. Building 2 is a 130,000 SF facility located along Western Boulevard. Denton Point is a rail-served development for manufacturing and supply chain uses.

The largest commercial and residential project in the city of Denton will be the Cole and Hunter Ranch developments, which received approval from the City Council in early 2020. Combined, the two developments include 6,400 acres for development. The master planned communities will include 12,900 single family units, 6,450 multifamily units, 485 acres for commercial development, and 256 acres for industrial development. The northern portion, near the airport, of the district is estimated to start in 2022. With a planned 40 year build out, these developments will be the largest and most impactful developments in Denton for years to come.

LONG-TERM FINANCIAL PLANNING

In conjunction with this document, interested parties are encouraged to read the City of Denton's FY 2021-22 Annual Budget document. This document details the City's strategic plan, long-term financial policies, program accomplishments, and other key initiatives. The document also includes the long-term financial forecasts for each of the major funds, and a summary of the assumptions that are included in these plans. In addition, the budget document provides an overview of the adopted Capital Improvement Program and planned future debt issuances. The Annual Budget can be accessed through the City's web site at www.cityofdenton.com and selecting Financial Transparency under the "Open Government" link.

RELEVANT FINANCIAL POLICIES

The City of Denton maintains reserve balances for emergencies. In the General Fund, the target reserve level is a minimum of 20% of budgeted expenditures with an additional 5% resiliency reserve for a combined total of 25% to provide stability and flexibility for the organization. As described in the accompanying ACFR document, the unassigned fund balance is \$38.5 million, or 26.8%, of the budgeted General Fund expenditures for the fiscal year ended September 30, 2021.

Beginning in FY 2011-12, the City adopted a policy which requires a minimum ending working capital balance (current assets minus current liabilities) of at least 8% of budgeted expenditures for the Electric, Water, Wastewater and Solid Waste Funds. If the working capital level should fall below the desired minimum, the City will implement necessary corrective action with a five-year plan to restore the working capital balance to 8% of budgeted expenditures.

Additionally, rate reserve levels were established for the Electric, Water, Wastewater, and Solid Waste Funds in FY 2011-12 according to the unique operational aspects of each utility. The rate reserve levels were most recently revised in FY 2015-16 based on the factors of revenue stability, expense and demand volatility, infrastructure age, debt levels and management plans for the use of these reserves. The rate reserve level is established at a range of 8% to 12% of expenses for the Electric Fund, at a range of 20% to 31% of expenses for the Wastewater Fund, at a range of 25% to 42% of expenses for the Water Fund, and at a range of 6% to 10% of expenses for the Solid Waste Fund. If the rate reserve level falls below the range, the City will implement necessary corrective action within a five-year plan to restore the balances to the levels outlined above.

The City of Denton has adopted an Investment Policy which guides the investment of all City funds. In accordance with State law, the policy is reviewed annually by the City Council to ensure that public funds are being invested in a conservative and prudent fashion. In addition, the City also annually reviews and approves a Debt Management policy. The purpose of this policy is to provide general guidelines regarding the issuance of City debt and the use and limitation of such debt. The City complied with all aspects of the Investment and Debt Management policies during FY 2020-21.

MAJOR INITIATIVES

The City's Strategic Plan and Council specifically identified improving facility infrastructure as a major goal. In response to this goal, the FY 2021-22 Budget includes additional issuance of General Obligation Bonds. This increase in funding shows the City's continued commitment to facility infrastructure and equipment funding.

The combination of increased operating funding along with the issuance of debt shows the strong commitment to improving our infrastructure. In the future, the City staff will continue efforts to identify additional funding for

facility infrastructure and equipment funding activities along with potential future debt issuances for street reconstruction to continue to improve the condition of the City's streets over the long term.

AWARDS AND ACKOWLEDGEMENTS

The Government Finance Officers' Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City for its Annual Comprehensive Financial Report for the fiscal year ended September 30, 2020, for the thirty-sixth consecutive year. To be awarded the Certificate of Achievement in Financial Reporting, the City must publish an easily readable and efficiently organized Annual Comprehensive Financial Report. This report satisfies both generally accepted accounting principles and applicable legal requirements. The Certificate of Achievement is held for a period of one year only. We believe our current Annual Comprehensive Financial Report continues to meet the Certificate of Achievement requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

The City also received the GFOA award for Distinguished Budget Presentation for its fiscal year 2020-21 Annual Budget for the thirty-fourth consecutive year. To qualify for the Distinguished Budget Presentation Award, the City's budget document was judged according to its compliance with specific guidelines established by GFOA. These guidelines help ensure that Denton's budget is distinguished as an operations guide, financial plan, policy document, and communications device. The City has submitted its fiscal year 2021-22 Annual Budget to GFOA to determine its eligibility for another certificate. We believe it continues to meet the Distinguished Budget Presentation Award criteria.

The City received a Certificate of Distinction from the Government Treasurers of Texas (GTOT). The distinction was received for developing an investment policy that meets the requirements of the Public Funds Investment Act and the standards for prudent public investing as established by the GTOT. The GTOT awards an estimated 35 distinctions annually, which the City has received seven times since 1999.

In 2022, City of Denton's has been awarded the Five Transparency Stares by the Texas Comptroller, which recognizes cities, counties, special purpose districts and school districts to provide easy online access to important financial data. The City of Denton is only one of 13 cities in Texas to receive all five transparency stars.

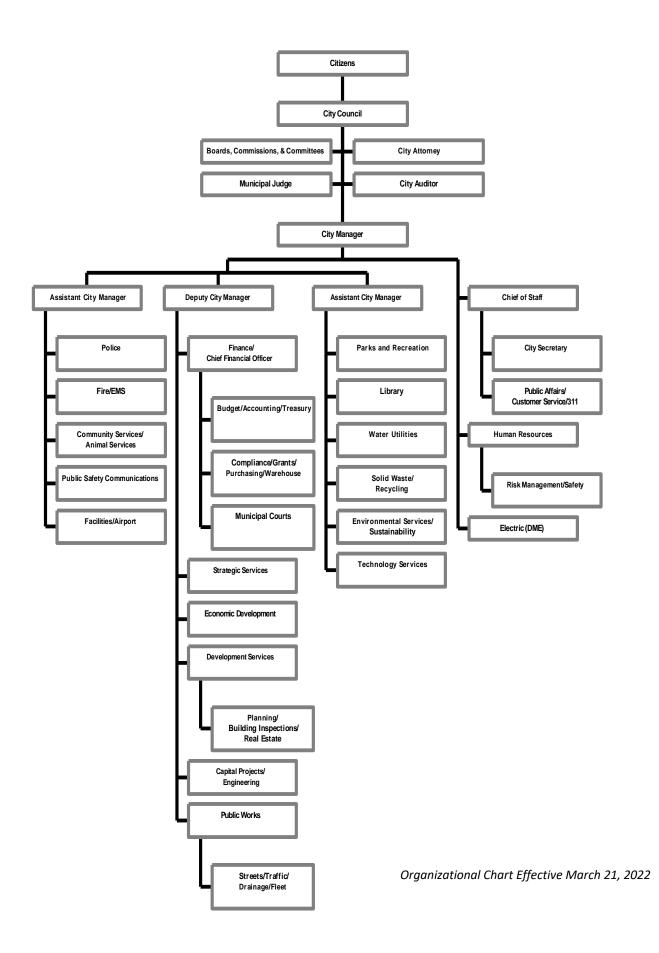

We would like to thank the City Council for their strong leadership and support that helped make the presentation of this report possible. We would also like to thank the City Manager, Finance staff, department directors, division heads and especially the Accounting Division staff for their diligent efforts in the preparation of the annual financial report.

Independent Auditor's Report

To the Honorable Mayor and Members of the City Council of The City of Denton, Texas

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Denton, Texas (the City), as of and for the year ended September 30, 2021, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The City's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

The Honorable Mayor and Members of the City Council of The City of Denton, Texas

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City as of September 30, 2021 and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the general fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and pension and OPEB information be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The introductory section, combining and individual fund financial statements and schedules, other supplemental information, and the statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund financial statements and schedules and other supplemental information are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund financial statements and schedules and other supplemental information are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory section and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it.

The Honorable Mayor and Members of the City Council of The City of Denton, Texas

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 30, 2022, on our consideration of the City's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the City's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the City's internal control over financial reporting and compliance.

Weaver and Tiduell, L.L.P.

WEAVER AND TIDWELL, L.L.P.

Dallas, Texas March 30, 2022

Introduction

The Management's Discussion and Analysis is designed to (a) assist the reader in focusing on significant financial issues, (b) provide an overview of the City's financial activity, (c) identify changes in the City's financial position (its ability to address the next and subsequent years' challenges), (d) identify any material deviations from the financial plan (the approved budget), and (e) identify individual fund issues or concerns.

This narrative should be read in conjunction with the transmittal letter at the beginning of the report and the financial statements following this section.

Financial Highlights

- The assets and deferred outflows of the City exceeded its liabilities and deferred inflows at the close of the fiscal year ended September 30, 2021 by \$1,275,778,368 (net position), an increase of 11.5 percent from prior year net position. Of this amount, \$156,021,556 (unrestricted net position) may be used to meet the government's ongoing obligations to citizens and creditors.
- Net Pension liability of the City is \$76,711,193, a decrease from prior year liability of \$87,260,281. Governmental Accounting Standards Board Statement No. 68, *Accounting and Financial Reporting for Pensions*, requires the City to report its net pension liability for participation in Texas Municipal Retirement System (TMRS) of the total Net Pensions Liability reported by the TMRS. As a result of recording the decrease in the City's portion of net pension liability (\$7,710,097), an increase in deferred pension inflows (\$1,244,573), and a decrease in deferred pension outflows (\$1,097,720).
- Governmental activities revenue were \$167,148,286 as compared to \$155,278,232 for the year ended September 30, 2020. The increase of \$11,870,054 is primarily driven by, an increase in tax revenues, property tax, and franchise fees. Business-type activity revenues were \$(1,975,432) in fiscal year 2020-2021, representing a decrease of \$6,634,667 from the prior year revenues of \$5,035,834. The decrease is primarily driven by a decrease in investment revenue due to low market interest rates.
- Governmental funds reported combined ending fund balances of \$228,084,437 as of September 30, 2021 which is an increase of \$36,544,920 from fiscal year 2019-2020 ending fund balance total of \$191,539,517.
- The City's primary General Fund resources are property taxes, sales tax, and franchise fees. Combined these resources account for 93.2 percent of total General Fund revenues which increased 7.9 percent from last year's results.
- The City's long-term liabilities outstanding increased by \$205,556,110 in fiscal year 2020-2021. The increase is primarily attributable to an increase of \$224,978,953 of Certificates of Obligation General Obligations Bonds Payable and Revenue Bonds Payable.

OVERVIEW OF THE FINANCIAL STATEMENTS

The Management's Discussion and Analysis is intended to serve as an introduction to the City of Denton's basic financial statements. The City's basic financial statements are comprised of three components: (1) government-wide financial statements, (2) fund financial statements and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide Financial Statements. The government-wide financial statements are designed to provide readers with a broad overview of the City's finances in a manner similar to a private-sector business.

The statement of net position presents information on all of the City's assets, liabilities, deferred inflows, and deferred outflows with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the City is improving or deteriorating.

The statement of activities presents information showing how the City's net position changed during the most recent fiscal year. All of the current year's revenues and expenses are considered regardless of when cash is

received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but not used vacation leave). Both the statement of net position and the statement of activities are prepared using the accrual basis of accounting as opposed to the modified accrual basis.

In the Statement of Net Position and the Statement of Activities, the City is divided between two kinds of activities:

- Governmental activities. Most of the City's basic services are reported here, including police, fire, libraries, development, public services and operations, public works, building inspection, technology services and general administration. Property taxes, sales taxes, and franchise fees finance most of these activities.
- **Business-type activities**. The City charges a fee to customers to cover the cost of services it provides. The City's utility systems (electric, water and wastewater), solid waste, and airport activities are reported here.

Fund Financial Statements. A fund is a grouping of related accounts used to maintain control over resources that have been segregated for specific activities or objectives. Fund financial statements provide detailed information about the most significant funds, not the City as a whole. Some funds are required to be established by state law or bond covenants. However, the City Council establishes many other funds to help control and manage money for particular purposes or to show that it is meeting legal responsibilities for using certain taxes, grants and other monies. The following illustration summarizes the major features the City's financial statements. The City of Denton's funds are categorized as governmental, proprietary funds or fiduciary funds.

• Governmental funds. The majority of the City's basic services are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end that are available for spending. These funds are reported using an accounting method identified as the modified accrual basis of accounting, which measures cash and all other financial assets that can readily be converted to cash. The governmental fund statements provide a detailed short-term view of the City's general government operations and the basic services it provides. Governmental fund information helps the reader determine whether there are more or fewer financial resources that can be spent in the near future to finance the City's programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government's near-term financing decisions. The relationship or differences between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds are detailed in a reconciliation following the fund financial statements.

The City of Denton maintains twelve governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the general fund, debt service fund and capital projects fund, all of which are considered to be major funds. Data from the other nine governmental funds are combined into a single, aggregated presentation. Individual fund data for eight of these non-major governmental funds, along with an aggregate of all other governmental funds, is provided in the form of combining statements elsewhere in this report.

• **Proprietary funds**. The City charges customers for certain services it provides, whether to outside customers or to other units within the City. These services are generally reported in proprietary funds. Proprietary funds are reported in the same manner that all activities are reported in the Statement of Net Position and the Statement of Activities. The City's enterprise funds are similar to the business-type activities that are reported in the government-wide statements but provide more detail and additional information, such as cash flows. The City's internal service funds are used to accumulate and allocate costs internally among the City of Denton's various functions. Both enterprise funds and internal service funds are components of proprietary funds.

The City of Denton maintains five enterprise funds. The City uses enterprise funds to account for its electric, water, wastewater, solid waste, and airport operations. The individual funds provide the same type of

information as the government-wide financial statements only in more detail. The City considers all enterprise funds to be major funds.

The City of Denton maintains eight internal service funds. The City uses internal service funds to account for materials management, fleet services, health insurance, risk retention, technology services, engineering services, customer service, and facilities management. Because these services benefit both governmental and business-type functions, they have been included in both the governmental and business-type activities in the government-wide financial statements. Individual fund data for the internal service funds are provided in the form of combining statements in the combining and individual fund statements and schedules section of this report.

Notes to the financial statements.

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other Information.

The combining nonmajor fund statements and individual fund schedules are presented immediately following the notes to the financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

As of September 30, 2021, the City's combined net position was \$1,275,778,368, of which \$328,693,298 can be attributed to governmental activities and \$947,085,070 attributed to business-type activities. This analysis focuses on the net position (Table 1) and changes in net position (Table 2) of the City's governmental and business-type activities.

The largest portion of the City's net position (80.8%) reflects its investment in capital assets (e.g., land, building, machinery and equipment), less any related debt used to acquire those assets that is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Table 1 Net Position (in thousands)

Governmental activities. Expenses for governmental activities reflect an increase of \$2.9 million over the prior year. Increases includes \$3.5 million for Parks and Recreation. This increase was offset by decreases of \$1.3 million in Public Works and \$5.5 million in Capital Outlay. The most significant governmental activities expense was in providing public safety, which incurred expenses of \$82,678,373. The largest expense for public safety is the cost of personnel, which totaled \$67,866,265. Last year the City added 8 new positions in public safety including 7.5 in the police department.

These expenses were funded by revenues collected from a variety of sources, with the largest being from property taxes, which are \$78,243,553 for the fiscal year ended September 30, 2021. Governmental activities program revenues increased \$11.8 million over the prior year. Charges for Services increase \$1.3 million from Parks and Recreation and Public Safety as pandemic restrictions eased. These revenue increases were offset by decreases in Capital grants and contributions and operating grants and contributions. Operating grants and contributions decreased \$0.4 million from funding for general government and public safety. Capital grants and contributions decreased \$11.0 million from additional grant funding for public works transportation projects as projects were completed. Governmental activities general revenues included an increase of \$2.8 million for property tax due to rising values and new construction. Franchise fee revenue increases of \$2.5 million were offset by declines in investment income of \$8.5 million as interest rates remained at historic lows. Transfers reflect a net \$2.0 million transfer in for governmental activities for the current year.

Business-type activities. Business-type activities increased the City's net position by \$84,751,836. This accounts for 74.24% of the growth in the entity-wide net position. All Utility service revenues increased by a total of \$4.7 million. Electric charges for services increased by \$125.5 million due to Storm Uri, which resulted in not only an increase in revenues but a large increase in expenses to offset. There were no rate adjustments for electric, water or wastewater customers for the fiscal year. Water charges for services decreased by \$.07 million as compared to the service charges from prior year. Wastewater charges increased \$0.2 million compared to the prior year. Solid Waste charges for service provided an increase of \$1.5 million compared to the prior year. Airport charges for goods and services were unchanged from the prior year. Water and Wastewater collected \$8.1 million and \$5.6 million in impact fees, respectively, reflecting a \$1.8 million increase over the prior year. Capital contributions, which arise from new property development within the City, represent a major revenue source for the Water and Wastewater funds during the current fiscal year. Capital contributions were \$18.3 million during the year and represent a \$1.9 million increase from the prior year. The Airport gas well revenues contributed an additional \$0.4 million to the increase in net position, a decrease of \$0.9 million from the prior year. Gas well revenues continue to decline as many wells in the City are being systematically plugged. Total enterprise funds operating costs, before depreciation, increased \$136.3 million. Electric expenses accounts for 80.3 percent of total enterprise fund expenses due to Storm Uri in February 2021, which included an increase of operating expense-purchased power of \$130.1 compared to prior year and administrative costs increased by \$8.1 compared to prior year. Water expenses increased \$2.9 million from the prior year, due to increased administrative costs of \$3.1 million. Wastewater expenses increased by \$1.4 million from the prior year, due to increased administrative costs of \$0.9 million. Solid Waste operations increased \$1.2 from the prior year, due to increased administrative costs of \$0.8 million.

FINANCIAL ANALYSIS OF THE GOVERNMENT'S FUNDS

As noted earlier, the City uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the City's governmental funds is to provide information on near-term inflows, outflows, and balances of resources available to spend. Such information is useful in assessing the City's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the City's governmental funds reported a combined ending fund balance of \$228.1 million, an increase of \$36.6 million in comparison with the prior year. \$37,690,456 constitutes unassigned fund balance, which is available for spending at the government's discretion. The remainder of the

fund balance has been classified to indicate that it is not available for new spending because it has already been classified as restricted (\$153.2 million), committed (\$18.1 million), and assigned (\$19.1 million).

The General Fund is the chief operating fund of the City. At September 30, 2021, the unassigned fund balance of the General Fund was \$38.5 million, or 26.8% of budgeted general fund expenditures. Revenues were \$11.9 million higher compared to the previous year primarily due to increases in taxes of \$3.1 million. Licenses and permits increased \$1.3 million from an update to the engineering and development review services fee structure to help recover costs. Intergovernmental revenue increased \$3.7 million over the prior year due to a \$3.3 million receipt of ARP Act funding. Franchise fees increased \$2.5 million in part due \$1.6 million increase in the Return on Investment (ROI) transfer percentage from the electric fund revenues. Parks and Recreation had an increase in charge for services of \$1.1 million as business resumed to normal. The net change in General Fund expenditures was \$3.1 million higher compared to the previous year primarily due to increased costs related to personnel services and operations. Personnel costs increased \$3.5 million over the prior year. Public safety increased \$3.2 million over the prior year due to the addition of 7.50 in the police department. The public safety increase was offset by decreases in general government of \$2.2 million. Operations, services costs were down \$2.2 million. These decreases were the result of government buildings, including libraries and recreation centers, being closed to the public sporadically and the majority of staff working from home the entire fiscal year. The libraries and recreation centers reopened with limited access and reduced hours the remainder of the year, with mandates

At the end of the fiscal year, the Capital Projects Fund has a total fund balance of \$153.7 million, an increase of \$28.4 million. The total fund balance is made up of \$125.9 million in restricted funds, \$8.7 million in committed funds, and \$19.0 million in assigned funds, all for capital construction and acquisition. In 2021, the City received \$75.6 million of proceeds from the issuance of debt and recognized \$23.7 million of regional toll revenues from the Texas Department of Transportation, while expending \$77.4 million on construction and acquisition. In addition, the capital projects fund received \$10.6 million of transfers from other funding sources. The City also received approximately \$10.0 million in developer's contributed capital recorded in the government-wide financial statements. This is \$1.0 million more than in the prior year.

The Debt Service Fund has a total fund balance of \$4.7 million, all of which is restricted for the payment of debt service. As compared with the prior year results, the overall decrease in the debt service fund balance of \$0.6 million resulted from a decrease in investment revenue as reinvestment rates on maturing investments and investment pools remained low.

Proprietary funds. The City's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net position at September 30, 2021 in proprietary funds are \$97.7 million for Electric, \$41.2 million for Water, \$31.8 million for Wastewater, \$3.5 million for Solid Waste, and \$3.0 million for the Airport fund. The results reflect increases of the unrestricted net position in the Electric Fund of \$28.2 million. The unrestricted net position decreased \$4.5 million in the Water Fund and \$1.4 million in the Wastewater fund. Other factors concerning the finances of these funds have already been addressed in the discussion of the City of Denton's business-type activities.

GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2021, five formal amendments to adjust the City of Denton's Annual Program of Services were approved by Council. Council approved funding to provide for additional improvements and other administrative expenses. The additional funds increased the General Fund by \$4.0 million for added transfer for Capital Projects, which included Athletic Field Lights as well as playground equipment. Additionally, Internal Service Fund additional funds increased by \$2.6 million, which included additional appropriations for the Risk Retention Fund of \$1.9 million to fund additional claims.

GENERAL FUND BUDGET TO ACTUAL HIGHLIGHT

For fiscal year 2021, General Fund actual expenditures (including transfers) on a budgetary basis were \$143.1 million compared to the final budget of \$143.5 million. The \$0.4 million favorable variance was primarily due to increased costs in personnel services.

Personnel savings are due to reduced costs of \$.07 million in general government, and \$1.3 in interfund-transfers in the general government. These positive variances were offset by general government expenditures which were \$3.2 million unfavorable to budget due in part to increased personal service in public safety. In addition to personnel savings, materials and supplies expenditures were favorable to budget for both general government of \$0.4 million and public works of \$.08million. These savings, as well as those for maintenance and repair costs, were the result of facility closures and program cutbacks due to the pandemic. Maintenance and repair costs were favorable to budget by \$0.08 million for public works.

Actual revenues for the General Fund (including transfers and sale of capital asset) on a budgetary basis were \$147.8 million compared to the final budget of \$143.5 million. Included in the \$4.3 favorable revenue variance was \$9.5 million of increases sales and property taxes as well as fees for service increase of \$1.6 million. These favorable variances were offset by declines of \$2.0 million in fines and forfeitures, and \$.6 million for franchise fees. Additional unfavorable variances to budget were \$0.6 million for investment revenue.

The City of Denton's General Fund unassigned fund balance at September 30, 2021 is \$38.5 million, or 26.8% of budgeted expenditures. Below is a listing of the ending unassigned balances for the prior year, as well as the fiscal year 2021 unassigned fund balance.

	Actual	Actual
	9/30/2021	9/30/2020
Unassigned balance	\$38,499,992	\$33,777,027
% of final budgeted expenditures	26.8%	24.7%
Policy level	20% plus up to	20% plus up to
	a 5% resiliency	a 5% resiliency
	reserve	reserve

The largest revenue source of the General Fund's budget was the ad valorem tax. Denton's ad valorem tax rate is comprised of two components. The first is the operations and maintenance component that is used to calculate revenue for the City's General Fund operations. The second component is the debt portion that is used to calculate revenue to pay the City's general debt service obligations. The Denton Central Appraisal District's certified appraisal roll shows an increase of 18.04% compared to the prior year certified value, which showed an increase of 11.52%. The current property tax year included \$469.0 million of new growth and construction that was added to the tax rolls in Tax year 2020 as compared to Tax year 2019. The fiscal year 2021 ad valorem tax rate remained unchanged at \$0.590450 compared to the prior years' rate per \$100 of valuation.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital assets. At the end of fiscal year 2021, the City had \$1.9 million invested in a broad range of capital assets, including police and fire equipment, buildings, park facilities, roads, bridges, electrical infrastructure, and water and sewer lines (see Table 3 below). This amount represents a net increase (including additions and deductions) of \$110.0 million or 6.2% over the prior fiscal year.

These amounts do not include net unamortized premiums/ (discounts) of \$22,123,885 or net deferred gain/ (loss) on refunding of (\$638,821).

During the current fiscal year, the City issued debt three times, November 2020, June 2021 and August 2021. The first debt issuance included \$14.5 million in general obligations refunding bonds, of which \$2.6 million was for enterprise operations and \$.3 million is for governmental activities. Proceeds from this issuance were used to pay for various capital improvements. The second debt issuance included \$97.0 million in certificates of obligation, of which \$77.0 million was for enterprise operations and \$20.0 million was for governmental activities. The third debt issuance included \$142.0 million in utility system refunding bonds. Proceeds from this issuance were used to refund certificates of obligation issued during the Storm Uri, for the purchased power expenses due to the storm.

Standard and Poor's Corporation has given both the City's General Obligation Bonds and Certificates of Obligation an "AA+" rating. Standard and Poor's Corporation has given the City's Utility System Revenue Bonds a rating of "A+". Fitch has given the City's General Obligation Bonds and the Certificates of Obligation a rating of "AA+." Fitch has given the City's Utility System Revenue Bonds a rating of "A". The City is permitted by Article XI, Section 5 of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of tax-supported debt to certified assessed value of all taxable property is 2.20%.

Other long-term liabilities. The City maintains a self-insurance program for general liability, auto liability, public officials' liability, errors and omission liability, police professional liability, and workers' compensation. Private insurance companies cover claims for property loss over \$50,000 per occurrence, except for specific perils, these deductibles vary depending on location and property values, for workers' compensation losses over \$600,000 per occurrence, and for liability over \$500,000 per occurrence. The Risk Retention Fund has a reserve for claims and judgments of \$3.4 million outstanding at year-end. Other obligations include pension liabilities, accrued vacation pay and sick leave. More detailed information about the City's long-term liabilities is presented in Note IV. F., on pages 56 - 60 of this report.

The City's Electric Fund has a liability set up for claims and judgements of \$4.0 million outstanding at year-end. More detailed information on this long-term liability can be found in note V.G. on page 85 of this report.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

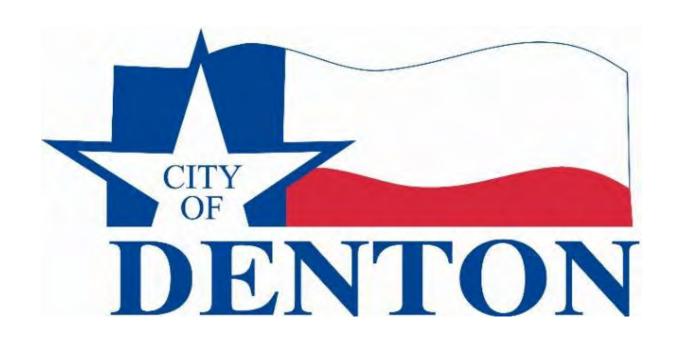

While growth for the Denton community is expected to be moderate in the short term, demands for city services are expected to remain strong over the long term. As a result, the fiscal year 2022 Budget includes an ad valorem tax rate of \$0.5658234/\$100 valuation which is a decrease from the prior year. While sales tax collections increased \$6.1 million compared to the prior year (15.4%), the fiscal year 2022 Budget projects an increase of 1.8% from actual fiscal year 2021 sales tax revenue. Budgeted funding enhancements for fiscal year 2022 include \$2.3 million for public safety. The fiscal year 2022 Budget included 18 approved supplements for additional staff, increase in operating contracts and capital.

The unemployment rate in City was 4.9 percent on September 30, 2021 compared to 6.9 percent as of September 30, 2020. The decline was due to a sharp increase during the COVID-19 global pandemic for fiscal year 2019-2020. Unemployment continues to improve reflected at 3.9 percent on October 31, 2021.

The fiscal year 2022 budget includes no rate changes for water, solid waste, electric or wastewater customers.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the City's finances for all those with an interest in the City's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the City of Denton Finance Department, 215 E. McKinney, Denton, Texas 76201.

CITY OF DENTON, TEXAS RECONCILIATION OF THE STATEMENT OF REVENUES,		Exhibit VI
EXPENDITURES, AND CHANGES IN FUND BALANCES		
OF GOVERNMENTAL FUNDS TO THE STATEMENT		
OF ACTIVITIES		
FOR THE YEAR ENDED SEPTEMBER 30, 2021		
Not shoung in fund haloness, total governmental funds (Fyhihit V)	¢	26 544 020
Net change in fund balances - total governmental funds (Exhibit V)	\$	36,544,920
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds report capital outlays as expenditures. However, in the		
statement of activities the cost of those assets is allocated over their		
estimated useful lives and reported as depreciation expense. This amount		
represents the difference between capital outlay of \$80,873,532 and depreciation		
of \$19,801,536 (which is the net of overall governmental activities depreciation of		
\$23,717,944 less internal service fund depreciation of \$3,916,408).		61,071,996
Revenues in the statement of activities that do not provide current financial		
resources are not reported as revenues in the funds. Such amounts are		
recorded in the funds when considered available.		(1,332,039)
The net effect of various miscellaneous transactions involving capital assets		
(i.e., sales, trade-ins and donations) is to increase net position.		9,217,514
Bond proceeds provide current financial resources to governmental funds, but		
issuing debt increases long-term liabilities in the statement of net position.		
Repayment of bond principal is an expenditure in the governmental funds,		
but the repayment reduces long-term liabilities in the statement of net		
position. This is the amount by which proceeds exceeded payments.		(55,591,809)
Fund-level financials report costs related to bonds as expenditures; however,		
these are deferred and amortized on the government-wide financials.		(4,993,485)
Certain expenses reported in the statement of activities do not require the use		
of current financial resources and therefore are not reported as expenditures		
in governmental funds.		2,603,175
Internal service funds are used by management to charge the costs of certain		
activities, such as insurance and technology services, to individual funds.		
A portion of the net revenue (expense) of certain internal service funds is		
reported with governmental activities. The amount reported with		
business-type activities is \$886,693.		(623,343)
Change in net position of governmental activities (Exhibit II)	\$	46,896,929

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The City of Denton is a municipal corporation governed by an elected seven-member council consisting of a mayor elected at large and six councilpersons, four representing specific geographical districts and two elected at large. The City receives funding from state and federal government sources and must comply with the requirements of these funding source entities. However, the City is not included in any other governmental "reporting entity," as defined in pronouncements by the Governmental Accounting Standards Board (GASB), as council members are elected by the public and have decision-making authority, the authority to levy taxes, the power to designate management, the ability to significantly influence operations, and primary accountability for fiscal matters.

The financial statements of the City have been prepared to conform to accounting principles generally accepted (GAAP) in the United States of America as applicable to state and local governments. Generally accepted accounting principles for local governments include principles prescribed by GASB, the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The following is a summary of the more significant policies.

A. Reporting Entity

An elected seven-member council consisting of a mayor and six councilpersons govern the City. As required by accounting principles generally accepted in the United States of America, these financial statements present the City (the primary government) and its component units, which are entities for which the City is considered to be financially accountable. Blended component units, although legally separate entities, are, in substance, part of the City's operations, and so data from these units are combined with data of the primary government. A discretely presented component unit, on the other hand, is reported in a separate column in the government-wide financial statements to emphasize it is legally separate from the City. The City had no component units, discretely presented or blended, at September 30, 2021.

B. Government-wide and Fund Financial Statements

The basic financial statements include both government-wide (based on the City as a whole) and fund financial statements. The reporting focus is either the City as a whole (government-wide financial statements) or major individual funds (within the fund financial statements). The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all non-fiduciary activities of the primary government. For the most part, the effect of inter-fund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The government-wide statement of activities demonstrates the degree to which the direct expenses of a functional category (public safety, public works, etc.) or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include (1) charges to customers or applicants who purchase, use or directly benefit from goods, services or privileges provided by a given function or segment; (2) grants and contributions that are restricted to meeting operational requirements of a particular function or segment; and (3) grants and contributions that are restricted to meeting the capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

The net cost (by function or business-type activity) is normally covered by general revenue (property taxes, sales taxes, franchise fees, interest income, etc.).

Separate fund financial statements are provided for governmental funds and proprietary funds. Major governmental funds and major enterprise funds are reported as separate columns in the fund financial statements. GASB Statement No. 34 sets forth minimum criteria (percentage of assets, liabilities, revenues or expenditures/expenses of either fund category and for the governmental and enterprise funds combined) for the determination of major funds. Non-major funds are combined in a column in the fund financial statements.

Internal service funds, which traditionally provide services primarily to other funds of the government, are presented in summary form as part of the proprietary fund financial statements. The financial statements of internal service funds are allocated (based on the percentage of goods or services provided) between the governmental and business-type activities when presented at the government-wide level.

The government-wide focus is more on the sustainability of the City as an entity and the change in aggregate financial position resulting from the activities of the fiscal period. The focus of the fund financial statements is on the major individual funds of the governmental and business-type categories, as well as the fiduciary funds (by category). Each presentation provides valuable information that can be analyzed and compared to enhance the usefulness of the information.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund statements. Revenues are recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund-level financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized, and susceptible to accrual, as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Any amounts collected beyond the 60 days are recorded as deferred inflows of resources. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

The City reports the following major governmental funds:

The general fund is the City's primary operating fund. All general tax revenues and other receipts that are not allocated by law or contractual agreement to some other fund are accounted for in this fund. From the fund are paid general operating costs, fixed charges and capital improvement costs that are not paid through other funds.

The debt service fund accounts for the accumulation of financial resources for the payment of principal, interest and related costs on general long-term debt, paid primarily by taxes levied by the City. On a budgetary-basis, the debt service fund also accounts for pass-through debt service payments from the self-supporting proprietary funds.

The capital projects fund accounts for financial resources used for the acquisition or construction of capital other than those recorded in the enterprise funds and internal service funds.

The ARPA fund accounts for the federal resources received by the City from the American Rescue Plan Act of 2021 and used for the programs as outlined by the plan.

Other governmental funds are a summarization of all of the non-major governmental funds.

The City reports the following major proprietary funds:

The City utility system is made up of three separate funds as follows:

The electric fund accounts for electrical utility services to the residents and commercial establishments of the City. Activities necessary to provide such services are accounted for in the fund, including, but not limited to, administration, operations, maintenance, finance and related debt service.

The water fund accounts for water utility services to the residents and commercial establishments of the City. Activities necessary to provide such services are accounted for in the fund, including, but not limited to, administration, operations, maintenance, finance and related debt service.

The wastewater fund accounts for sewer and storm water services to the residents and commercial establishments of the City. Activities necessary to provide such services are accounted for in the fund, including, but not limited to, administration, operations, maintenance, finance and related debt service.

The City provides additional services through the following funds:

The solid waste fund accounts for the provision of solid waste services to the residents of the City. Activities necessary to provide such services are accounted for in the fund, including, but not limited to, administration, operations, maintenance, finance and related debt service.

The airport fund accounts for the airport services to the public and is funded through operational and gas well revenues. Activities necessary to provide such services are accounted for in the fund, including, but not limited to, administration, operations, maintenance, and finance.

The City additionally reports the following funds:

Internal service funds are used to account for the financing of materials and services provided by one department of the City to other departments of the City on a cost-reimbursement basis.

The materials management fund accounts for the financing of the goods and services of the purchasing department as well as the management and inventory of the City warehouse activities.

The fleet services fund accounts for the financing of goods and services provided by the activities of the City garage and machine shop to other departments.

The health insurance fund accounts for the accumulation of resources for the self-insurance activities of the City for employee medical insurance as well as other employee insurance benefits including long-term disability, short-term disability, and dental and vision insurances.

The risk retention fund accounts for the accumulation of resources for the payment of activities associated with providing general liability insurance coverage and self-funded activities for City departments.

The technology services fund accounts for financing and management of technology equipment, software, and services such as programming, support, training, maintenance, and office services to City departments.

The engineering services fund accounts for providing engineering, real estate, public works inspection, and development review services primarily to City departments although some services are provided to and paid by external entities.

The customer service fund accounts for providing customer service activities to residents and businesses for City departments. Services include bill pay, utility service requests, connect/disconnect services, maintenance of customer accounts, utility billing, operator calls, collections, accounts receivable, and cash handling.

The facilities fund accounts for the maintenance of all city-owned facilities and vertical construction projects.

The City does not have any fiduciary funds as of fiscal year ending September 30, 2021.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the City's electric, water, wastewater, solid waste, and airport funds are charges to customers for services. Operating expenses for the enterprise funds and internal service funds include the cost of sales and services, administrative expenses and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the City's policy to use restricted resources first, then unrestricted resources as they are needed.

D. Budgetary Information

The City Council follows these procedures, as prescribed by City Charter, in establishing the budgets reflected in the financial statements:

- 1. Within the time period required by law, the City Manager submits to the City Council a proposed budget for the fiscal year beginning on the following October 1. The operating budget includes proposed expenditures and the means of financing them.
- 2. Public hearings are conducted prior to the adoption of the budget in order to obtain taxpayer comments.
- 3. The annual budget adopted by the City Council covers the general fund, non-major special revenue funds (Recreation Fund, Police Confiscation Fund, Tourist and Convention Fund, Gas Well Revenues Fund, Street Improvement Fund, and the Citizens' Park Trusts), the debt service fund, the enterprise funds, and internal service funds. The budget is legally enacted by the City Council through passage of an ordinance prior to the beginning of the fiscal year. The basic financial statements reflect the legal level of control, (i.e. the level at which expenditures cannot legally exceed the appropriated amount) which is established at the total fund level as approved by City Council.
- 4. The City Charter provides for the City Manager to transfer any part of the unencumbered appropriation balance or the entire balance thereof between programs or general classifications of expenditures within an office, department, agency or organizational unit. (The City Council defines an organizational unit as set forth in Article VIII, Section 8.07 of the City Charter, to be a fund that has been appropriated by the City Council.) City Council approval is not required up to the fund level. The Charter also provides that at any time during the year, at the request of the City Manager, City Council may by resolution transfer any part of the unencumbered appropriation balance or the entire balance thereof from one office, department, agency, or organizational unit to another, as well as make any increases in fund appropriations.

Budgets are adopted on a basis for the governmental funds and the budgeted special revenue funds that is generally consistent with generally accepted accounting principles. Budgets for enterprise funds are prepared on the full accrual basis, except certain noncash transactions such as depreciation expense and amortization on debt issuance costs where it is not budgeted, and debt service payments where it is budgeted. Also, during the budgetary process, amounts are included in all fund budgets to recognize administrative transfers between funds for goods or services. These amounts are not included in the reporting of actual activity for the funds. For funds reporting required budget-to-actual comparisons, these administrative transfers are included as adjustments – budgetary basis.

Appropriations in all budgeted funds lapse at the end of the fiscal year even if they have related encumbrances. Encumbrances are commitments related to unperformed contracts for goods or services (i.e., purchase orders and contracts). While all appropriations and encumbrances lapse at year end, valid outstanding encumbrances are re-appropriated against the subsequent year's budget, reducing the available appropriations for additional expenditures.

E. Assets, Liabilities and Net Position or Equity

1. Cash, cash equivalents and investments

The City's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of acquisition. Investments are carried at fair value, except for the position in local government investment pools. Fair value is determined as the price at which two willing parties would complete an exchange.

The City uses a pooled cash and investment fund to hold and account for all of the City's investments. For financial reporting purposes, the investment balances in the pooled fund are allocated back to the individual funds based on their respective share of the pooled total. Interest earned on investments is also allocated back and recorded directly to the individual funds on a monthly basis.

2. Receivables

Outstanding balances between funds are reported as "interfund receivables/payables." Any residual balances between governmental activities and business-type activities are reported in the government-wide statements as "internal balances."

Trade, property tax receivables, and municipal court receivables are shown net of an allowance for uncollectible accounts. The City accrues amounts for utility services provided in September, but not billed at September 30, 2021.

3. Inventories

Inventories of supplies are maintained at the City warehouse for use by all City funds and are accounted for by the consumption method. Cost is determined using a moving average method. No inventories exist in the governmental fund types.

4. Prepaid items

Certain costs applicable to future accounting periods are recorded as prepaid items. Most of these balances are due to payments into an account for energy settlements in the Electric Fund and health claims in the Employee Insurance Fund.

5. Other Assets

Certain costs applicable to future accounting periods are recorded as other assets. In a prior fiscal year the City fully impaired its TMPA prepaid purchase power due to a permanent closure in generation and subsequent sale of the plant. The impaired amount was recorded as an Other Asset (regulatory) to be amortized over 7.5 years in the electric fund, of which 3.5 years is remaining in the electric fund to be recovered through rate revenues. See note IV.F. for more information on Other Assets and V.E. *Agreement with TMPA* for further information regarding TMPA.

6. Restricted assets

Certain proceeds of the City's governmental and proprietary fund general obligation bonds and certificates of obligation, as well as certain resources set aside for their repayment, are classified as restricted assets on the balance sheet because their use is limited by applicable bond covenants. Assets collected from impact fees are limited by state statute in use and also shown as restricted on the balance sheet of the Water and Wastewater funds.

7. Capital assets

Capital assets, which include property, plant, equipment and infrastructure assets (e.g., roads, bridges, sidewalks and similar items) are reported in applicable governmental or business-type activities columns in the government-wide financial statements and in the proprietary fund financial statements. The City defines capital assets as assets with an initial, individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if

purchased or constructed. Donated capital assets are recorded at acquisition value, which is the price that would be paid to acquire an asset with equivalent service potential at the acquisition date.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Net interest incurred during the construction phase of capital assets of business-type activities and enterprise funds is included as part of the capitalized value of the assets constructed. For 2021, net interest capitalization of \$1,080,703 was recorded for electric fund projects, \$1,592,593 for water fund projects, \$831,283 for wastewater fund projects, and \$59,061 for solid waste fund projects.

Capital assets are depreciated using the straight-line method over the following useful lives:

<u>Assets</u>	<u>Years</u>
Buildings	40
Infrastructure	20 - 40
General improvements	10
Machinery and equipment	10 - 20
Furniture and office equipment	10
Computer equipment/software	3 - 10
Plant and equipment	5
Underground pipe	40
Water storage rights	50 - 100
Water recreation rights	50
Communication equipment	5
Vehicles	3 - 10

Renewals and betterments of property and equipment are capitalized, whereas normal repair and maintenance are charged to expense as incurred.

8. Compensated absences

The City allows full-time employees to accumulate unused vacation time without a maximum balance. Upon termination, accumulated vacation time up to 320 hours (480 for civil service fire employees) will be paid to an employee. Generally, sick leave is not paid upon termination except for civil service fire fighters and police officers. Firefighters and police officers accumulate for payout unused sick leave up to a maximum of 1080 hours and 720 hours, respectively. All other employees are paid only upon illness or other valid sick leave uses while employed by the City. Accumulated vacation and sick leave is accrued when incurred in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements but have not been paid this amount at the end of the fiscal year. The General Fund and Other Governmental Funds are used to record any payout expenditures of the governmental funds' employees and related liability, while proprietary fund payouts for their employees are recorded as reductions to the liabilities in those funds.

9. Arbitrage

Arbitrage involves the investment of the proceeds from the sale of tax-exempt bonds in taxable instruments and securities authorized by the Public Funds Investment Act (Texas Government Code, Chapter 2256) that yield a higher rate, resulting in interest revenue in excess of interest costs. Federal tax code requires that these excess earnings be rebated to the federal government. The Capital Projects Fund has been used in prior years to liquidate governmental funds' related liability. There were no arbitrage payments in the current fiscal year.

10. Pensions

For purposes of measuring the net pension liability, pension-related deferred outflows and inflows of resources, and pension expense, information about the Fiduciary Net Position of the Texas Municipal Retirement System (TMRS) and the Firemen's Relief and Retirement Fund (FRRF) and additions to/deductions from TMRS's and the FRRF's Fiduciary Net Position have been determined on the same basis as they are reported by TMRS and the FRRF. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

11. Other post-employment benefits

The City participates in a single-employer, unfunded, defined benefit group-term life insurance plan operated by the Texas Municipal Retirement System (TMRS) known as the Supplemental Death Benefit Fund (SDBF). The City elected, by ordinance, to provide group-term life insurance coverage to both current and retired employees. The funding policy for the SDBF program is to assure that adequate resources are available to meet all death benefit payments for the upcoming year rather than prefunding. Benefit payments are treated as being equal to the City's yearly contribution for retirees. For purposes of measuring the total SDBF OPEB liability, related deferred outflows and inflows of resources, and expense, City specific information about its total SDBF liability and additions to/deductions from the City's total SDBF liability have been determined on the same basis as they are reported by TMRS. The SDBF expense and deferred (inflows)/outflows of resources related to SDBF, primarily result from changes in the components of the total SDBF liability. Most changes in the total SDBF liability will be included in SDBF expense in the period of the change. For example, changes in the total SDBF liability resulting from current-period service cost, interest on the Total OPEB Liability, and changes of benefit terms are required to be included in SDBF expense immediately. Changes in the total SDBF liability that have not been included in SDBF expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to SDBF.

The City provides post-employment medical care (Medical OPEB) for retired employees through a single-employer defined benefit medical plan. The plan provides medical benefits for eligible retirees, their spouses, and their dependents through the City's group health insurance plans. By providing retirees with access to the City's healthcare plans based on the same rates it charges to active employees, the City is in effect providing a subsidy to retirees. This implied subsidy exists because, on average, retiree healthcare costs are higher than active employee healthcare costs. By the City not contributing anything toward the plan in advance, the City employs a pay-as-you-go method through paying the higher rate for active employees each year. The City also contributes up to \$200 per month, based on years of service, toward the cost of retiree coverage. As an irrevocable trust has not been established, the plan is not accounted for as a trust fund. For this purpose, plan contributions are recognized in the period that the direct and indirect subsidies are paid by the City. Total OPEB liability, OPEB-related deferred outflows and inflows of resources, and OPEB expense is based on the actuarial measurement dates.

12. Long-term obligations

In the government-wide financial statements and proprietary fund types in the fund financial statements, long-term obligations are reported as liabilities. Bond premiums and discounts are deferred and amortized over the life of the bonds. Bonds payable are reported net of the applicable bond premium or discount. Gain/loss on refunding are reported as deferred outflow/inflow and recognized as a component of interest expense over the remaining life of the old debt or life of the new debt, whichever is shorter.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

13. Fund equity

The City follows GASB Statement No. 54, "Fund Balance Reporting and Governmental Fund Type Definitions", and in accordance with the statement, the classifications of governmental fund balances are presented as follows:

Nonspendable fund balances – includes amounts not in a spendable form or are legally or contractually required to be maintained intact. Examples include inventory or endowments.

Restricted fund balance – includes amounts that can be spent only for the specific purposes stipulated by external resource providers, creditors, grantors, and contributors or through enabling legislation.

Committed fund balance — includes amounts that can be used only for the specific purposes determined by the City Council through an ordinance and may only be changed or lifted through another ordinance. The ordinance must either adopt or rescind the commitment, as applicable, prior to the last day of the fiscal year for which the commitment is made. The amount subject to the constraint may be determined in the subsequent period.

Assigned fund balance - comprises amounts intended to be used for specific purposes. Intent can be expressed by the City Council, or per the policy adopted by an ordinance by the City Council, the City Manager or the City Manager's designee (assistant city manager) may also make an assignment. In governmental funds other than the general fund, assigned fund balance represents the amount that is not restricted or committed and, at a minimum, is intended for the purpose of that fund.

Unassigned fund balance – is the residual classification of the general fund and includes all amounts not constrained in the other classifications. Unassigned amounts are technically available for any purpose. The General Fund is the only fund to report a positive unassigned fund balance amount. However, other governmental funds may report a negative unassigned fund balance as necessary if expenditures incurred for specific purposes exceed the amounts restricted, committed, or assigned for those purposes.

When multiple categories of fund balance are available for expenditure and approved for use by the City Council, the City will start with the most restricted category and spend those funds first before moving down to the next category with available funds. Normally this would result in the use of restricted, then committed, then assigned, and lastly, unassigned fund balance.

14. Minimum fund balance policy

It is the goal of the City to achieve and maintain an unassigned fund balance in the General Fund equal to 20% of budgeted expenditures. An additional 5% resiliency reserve (25% combined total) may be maintained to safeguard against unusual financial circumstances or economic downturns.

15. Net position

Net position represents the difference between assets, deferred inflows, deferred outflows, and liabilities. Net investment in capital assets consists of capital assets net of accumulated depreciation and the outstanding balances of any borrowing spent for the acquisition, construction or improvements of those assets. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the City or through external restrictions imposed by creditors, grantors or laws or regulations of other governments.

16. Deferred outflows and inflows of resources

In addition to assets, the statement of net position and/or balance sheet will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position applying to a future period and will not be

recognized as an outflow of resources, either expenses or expenditures, until that time. The City reports the following items qualifying for this category:

- Deferred loss on refunding reported in the statements of net position A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price and is amortized over the shorter of the life of the refunded or refunding debt.
- Deferred pension actuarial losses reported in the statement of net position A deferred charge is recorded for the difference between actual experience and expected experience during the period between two actuarial valuations and is amortized over future periods.
- Deferred pension and other postemployment benefit plan contributions reported in the statement of net position A deferred charge is recorded for pension contribution amounts paid by the City after the current year's measurement date (December 2020) and will be fully recognized as a reduction of the respective liability in the next period on the next measurement date (December 2021).
- Deferred pension and other postemployment benefit plan actuarial assumption changes A
 deferred charge is recorded for the difference due to assumption changes and amortized over
 future periods.

In addition to liabilities, the statement of net position and/or balance sheet will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position applying to a future period and will not be recognized as an inflow of resources, or revenues, until that time. The City reports the following items qualifying for reporting in this category:

- Deferred gain on refunding reported in the statements of net position A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price and is amortized over the shorter of the life of the refunded or refunding debt.
- Deferred pension excess earnings reported in the statement of net position A deferred charge is recorded for the difference between actual investment earnings and expected investment earnings during the period and is amortized over future periods.
- Deferred pension and other postemployment benefit plan actuarial gains reported in the statement of net position A deferred charge is recorded for the difference between actual experience and expected experience during the period between two actuarial valuations and is amortized over future periods.
- Deferred pension and other postemployment benefit plan actuarial assumption changes A
 deferred charge is recorded for the difference due to assumption changes and amortized over
 future periods.
- Deferred unavailable revenues reported on the balance sheet of the governmental funds A deferred amount is recorded for the billed revenues not yet collected or available. These amounts are deferred and recognized as inflow of resources in the period the amounts become available.

F. Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses/expenditures during the reporting period. Actual results could differ from those estimates.

II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

Explanation of certain differences between the governmental fund statement of revenues, expenditures and changes in fund balances and the government-wide statement of activities

An element of that reconciliation states, "Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net position. Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position. This is the amount by which proceeds exceeded payments." The details of this (\$55,591,809) difference are as shown on the following page:

Debt issued or incurred:	
Issuance of general obligation debt	\$(56,125,000)
Issuance of certificates of obligation	(20,890,000)
Principal repayments:	
General obligation debt principal retirement	11,523,191
Certificates of obligation principal retirement	8,245,000
Refunded debt principal	1,655,000
Net adjustment to decrease net changes in fund	
balances – total governmental funds to arrive at	
changes in net position of governmental activities	\$(55,591,809)

Another element of that reconciliation states, "The net effect of various miscellaneous transactions involving capital assets (i.e., sales, trade-ins and donations) is to decrease net position." The details of this \$9,585,637 difference are as follows:

Net effect of transactions involving asset retirements/disposals	\$ (747,002)
Capital assets transferred to business-type activities as	(* * *,* * * /
capital contributions	-
Donations of capital assets increase net position in the	
statement of activities but do not appear in the	
governmental funds because they are not financial	
resources	9,964,516
Net adjustment to increase net changes in fund	
balances - total governmental funds	\$ 9,217,514

Another element of that reconciliation states, "Certain expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds." The details of the \$2,603,175) difference are as follows:

Change in:

Compensated absences	\$ (967,114)
Net pension liability	8,249,146
Municipal pension deferred actuarial gains/losses	(1,992,871)
Municipal pension deferred contributions	(5,754)
Municipal pension deferred assumption changes	(751,392)
Municipal pension deferred economic differences	332,515
Total OPEB liability	(4,035,049)
OPEB deferred contributions	59,384
OPEB deferred assumption changes	1,930,556
OPEB deferred economic differences	266,389
Accrued interest	(482,635)
Net adjustment to decrease net changes in fund	
balances - total governmental funds to arrive at	
changes in net position of governmental activities	\$ 2,603,175

III. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Deficit Fund Equity

The Materials Management, Risk Retention, Engineering Services, and Customer Service internal service funds had deficit net positions of (\$575,863), (\$3,131,650), (\$2,412,583), and (\$2,063,516), respectively, due to the implementation of GASB Statement No. 68 "Accounting and Financial Reporting for Pensions-an amendment of GASB Statement No. 27" and GASB Statement No.75 "Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions" (OPEB) which resulted in an increase in the net pension liability and the total OPEB liability in the prior years during implementation.

IV. DETAILED NOTES ON ALL FUNDS

A. Deposits and Investments

In order to facilitate effective cash management practices, the operating cash of all funds is pooled into a common account for the purpose of increasing income through combined investment activities. At year-end, the City had \$291,494,142 in cash and cash equivalents of which \$9,968 is in petty cash.

The Public Funds Investment Act (Texas Government Code) authorizes the City to invest in obligations of the U.S. Treasury, U.S. agencies, fully collateralized repurchase agreements, public fund investment pools, SEC-registered no-load money market mutual funds, municipal securities of any state rated A or better, certificates of deposit (fully collateralized, insured, and standby letters of credit backed), and commercial paper rated not less than A-1 or P-1 with a stated maturity of no more than 365 days. The City's investment policy may further restrict those investment options. The investments reported on September 30, 2021 were similar to those held during the fiscal year.

The City reports all investments in the financial statements at fair value. At September 30, 2021, the City's investments carried a fair value of \$653,150,428, of which \$244,775,270 is in a local governmental investment pool which the City classifies in the financial statements as cash equivalents, resulting in \$408,375,158 of investment balances reported in the financial statements.

The City categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. GASB Statement No. 72, Fair Value Measurement and Application establishes an authoritative definition of fair value, sets a framework for measuring fair value, and requires additional disclosures about fair value measurements. The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels.

- Level 1 inputs are quoted prices (unadjusted) for identical assets or liabilities in active markets a government can access at the measurement date.
- Level 2 inputs are inputs, other than quoted prices included within Level 1, observable for an asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable inputs for an asset or liability.

The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. If a price for an identical asset or liability is not observable, a government should measure fair value using another valuation technique maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. If the fair value of an asset or a liability is measured using inputs from more than one level of the fair value hierarchy, the measurement is considered to be based on the lowest priority level input significant to the entire measurement.

At September 30, 2021, the City had the following recurring fair value investments:

				Fair Value Mea	suren	nent Method	_	
			Que	oted Prices in				Weighted
			Ac	tive Markets	Sign	nificant Other	Percent of	Average
			f	or Identical	Obs	ervable Inputs	Total	Maturity
		9/30/2021	Ass	sets (Level 1)		(Level 2)	Investments	(Days)
Investments Measured at Amortized	Cos	t:						
TexSTAR - Investment Pool	\$	129,775,270	\$	-	\$	-	19.87%	1
TexPool - Investment Pool		115,000,000		-		-	17.61%	1
Investments by Fair Value Level:								
Debt Securities:								
U.S. Treasury Securities		199,936,843		199,936,843		-	30.61%	235
U.S. Agency Securities		113,364,650		-		113,364,650	17.37%	213
Commercial Paper		89,984,765		-		89,984,765	13.78%	98
Municipal Bonds - Coupon		5,088,900				5,088,900	0.78%	137
Total Investments	\$	653,150,428	\$	199,936,843	\$	208,438,315		
Portfolio Weighted Average Maturi	ity							124

Of the investments recorded at fair value, the U.S treasuries are valued on trade history pricing models of those securities, and the U.S. agency securities, commercial paper, and municipal bonds are valued based upon observable inputs, including but not limited to, model prices for similar assets, benchmark yield curves, and matrix pricing.

Interest rate risk. In accordance with its investment policy, the City manages its exposure to declines in fair values due to interest rate fluctuations by limiting the weighted average maturity of its investment portfolio to less than eighteen months.

Credit risk. The City's investment policy limits investments to obligations of the United States of America and its agencies, investment quality obligations of the State of Texas (including agencies, municipalities, counties, and other political subdivisions) with a rating not less than AA, certificates of deposits and savings deposits (fully insured, collateralized, or standby letter of credit backed), fully collateralized repurchase agreements, local public fund investment pools with a dollar weighted average maturity of 60 days or less, U.S. government money market mutual funds with a dollar weighted average maturity of 60 days or less and a stable net asset value of \$1 for each share, and commercial paper that has a maturity of 270 days or less and a minimum rating of A-1, P-1, or an equivalent rating by at least two nationally recognized rating agencies. The City's investments in TexSTAR and TexPool were rated "AAAm" by Standard & Poor's, the highest rating a local government investment pool can achieve.

Custodial credit risk. This is the risk that in the event of a bank or counterparty failure, the City's deposits may not be returned. The policy states that all bank deposits of City funds shall be secured by pledged collateral with a market value equal to no less than 102 percent of the principal plus accrued interest less an amount insured by FDIC. As of September 30, 2021, the bank balance for deposits was \$49,678,429 and was fully collateralized by the City's third-party custodian, BNY Mellon.

Concentration of Credit Risk. The City's investment policy minimizes the risk of potential loss by diversifying investment types according to the following limitations based on value: U.S. Treasury bills/notes/bonds (100%), U.S. Agencies and Instrumentalities (100%), State of Texas Obligations – including agencies and local governments (15%), local government investment pools (50% in government securities and 15% in prime securities), repurchase agreements (20%), certificates of deposit (35%), savings deposits (15%), U.S. Money Market Mutual Funds (50%), callable U.S. Agencies and Instrumentalities (20%), and commercial paper (15%).

Local Government Investment Pools. During the year, the City invested in two public fund investment pools, TexSTAR and TexPool. The fair value of the position of TexSTAR is measured at net asset value, and the fair value of the position of TexPool is measured at amortized cost. Each pool's governing body is comprised of individuals who are employees, officers, or elected officials of participants in the funds or who do not have a business relationship with the fund and are qualified to advise. Investment objective and strategies of the pools are to seek preservation of principal, liquidity and current income through investment in a diversified portfolio of short-term marketable securities. Pools offer same day access to investment funds, which may be redeemed daily. As the redemption period is only one day or less, the City classifies these balances in the financials as cash equivalent. The pools may only impose restrictions on redemptions in the event of a general suspension of trading on major securities markets, a general banking moratorium, or a national state of emergency affecting the pool's liquidity. The City has no unfunded commitments related to the investment pool.

Cash, cash equivalents and investments, at fair value are reported together on the financial statements. Investments, at fair value, by fund were as follows:

								Other
							Go	vernmental
	Ge	neral Fund	De	bt Service	Cap	oital Projects		Funds

B. Property Tax Revenue

Property taxes attach as an enforceable lien on property as of January 1st. Taxes are levied on October 1st and are due and payable at that time; therefore, the legally enforceable claim arises on October 1st. A receivable is recorded at that time. All unpaid taxes levied October 1st become delinquent February 1st of the following year.

Property taxes at the fund level are recorded as receivables and revenue in the period they become available. Current-year revenues recognized are those Ad valorem taxes collected within the current period or soon enough thereafter to pay current liabilities, which is sixty days after year-end. All other outstanding receivables are adjusted from revenue and recognized as deferred inflows of resources for future collections. Current tax collections for the year ended September 30, 2021 were 99.47% of the tax levy. An allowance is provided for delinquent taxes not expected to be collected in the future.

At September 30, 2021, the City had a tax rate of \$0.590454 per \$100 valuation. Based upon the maximum Ad valorem tax of \$2.50 per \$100 valuation imposed by Texas Constitutional law, the City had a tax rate margin of \$1.909546. Additional revenues up to \$253,706,808 could be raised per year based on the current year's certified assessed value of \$13,286,237,052 before the limit is reached.

On December 7, 2010, the City Council approved a Tax Increment Financing Reinvestment Zone (TIRZ #1) for the purpose of dedicating the increase in tax revenues generated within the TIRZ district for development in the downtown area of the City for a total of 30 years. The tax increment to be paid is 100% of the increment

in years 1-5, 95% in years 6-10, 90% in years 11-20, and 85% in years 21-30. In fiscal year 2021, the total assessed value of \$234,054,363 after supplemental adjustments for TIRZ #1 was an increase of \$154,697,509 over the base fiscal year 2011 assessed value and resulted in \$867,747 of property tax revenue recorded in the TIRZ Fund as part of All Other Special Revenue Funds.

On December 18, 2012, the City Council approved a Tax Increment Financing Reinvestment Zone (TIRZ #2) for the purpose of dedicating 40% of the increase in tax revenues generated within the TIRZ district for development in the Westpark Industrial District for a total of 25 years. In fiscal year 2021, the assessed value of \$175,546,028 after supplemental adjustments was an increase of \$175,426,570 over the base fiscal year 2014 assessed value and resulted in \$414,325 of property tax revenue recorded in the TIRZ Fund as part of All Other Special Revenue Funds. Denton County participates in the zone and based on their tax rate and a participation contribution of 40% of the County's tax rate, \$157,873 of property tax revenue was generated for Fiscal Year 2021.

The City created the Rayzor Ranch Public Improvement District No. 1 in 2014 for the undertaking and financing of public improvements authorized by Chapter 372 of the Texas Local Government Code. The project is located on the City's northern sector, east of Interstate 35, and encompasses approximately 229.693 contiguous acres. The estimated costs of the proposed public improvements total \$40 million. The authorized improvement costs will be apportioned 100% to the District. The method of assessment will impose equal shares of the costs of the proposed public improvements on parcels that are similarly benefited. No City property will be assessed, and the City will not be obligated to pay any assessments.

C. Receivables

Receivables at September 30, 2021 for the City's individual major funds and other funds (non-major funds, internal service funds and fiduciary funds), including the applicable allowances for uncollectible accounts, are as follows:

			Capital		Other Governmental

E. Interfund Receivables, Payables and Transfers

A summary of interfund receivables and payables (in thousands) at September 30, 2021, is as follows:

		Interfund Receivables:														
	Gove	rnmental														
	Majo	or Funds		Busine	ds											
Interfund Payables:	General Fund		Electric		Water		Wastewater		Total							
Non-Major																
Governmental Funds	\$	554	\$	-	\$	-	\$	-	\$	554						
Internal Service Funds		721	,	7,715		7,715		7,715		7,715		1,243		321	1	0,000
Total	\$	1,275	\$ '	7,715	\$	1,243	\$	321	\$1	0,554						
			_		_		_									

The more significant interfund receivables and payables include the following:

Interfund receivables	Interfund payables	Amount
Electric fund	Internal service funds-materials management	\$ 7,714,503
Water fund	Internal service funds-materials management	1,242,821
General fund	Internal service funds-materials management	721,383
General fund	Non-Major Governmental Funds	553,587
Wastewater fund	Internal service funds-materials management	321,293

The outstanding balances between the Electric, Water, Wastewater, and General Fund related to the Materials Management Fund are a result of the cash position in the Materials Management Fund due to inventory purchases. The outstanding balance between the General Fund and the Non-Major Governmental Funds is due to reimbursement timing from outside sources.

Transfers between funds (in thousands) during the year were as follows:

							Tra	ansfers	Out:							
	Gove	rnmental														
	Majo	or Funds	Business-Type Major Funds													
			Non-Major Governmental		Electric		Water		Wastewater		Airport		Internal Service			
Transfers In:	Gene	ral Fund	Funds		Fund		Fund		Fund		Fund		Funds		Total	
Governmental Major Funds:																
General Fund	\$	-	\$	34	\$	-	\$	-	\$	-	\$	-	\$	-	\$	34
Debt Service Fund		-		-		-		-		-		763		-		763
Capital Projects Fund		4,446		5,726		-		33		-		-		397	10),602
Non-Major Governmental Funds		3,751		-		791		213		146		50		-	4	1,951
Water Fund		-		-		28		-		-		-		-		28
Solid Waste Fund		-		-		-		-		-		-		20		20
Internal Service Funds		300		-		-		-		-		-		-		300
Total	\$	8,497	\$	5,760	\$	819	\$	246	\$	146	\$	813	\$	417	\$16	5,698

The more significant transfers include the following:

Transfers from fund	<u>Transfers to fund</u>	<u>Amount</u>
General Fund	Non-Major Gov't – Recreation Fund	\$ 3,699,937
Non-Major Gov't - Street Improvement Fund	Capital Projects	4,522,083
General Fund	Capital Projects	4,446,502
Business-type Major Funds (Electric, Water, and	Non-Major Gov't – Street Improvement Fun	1,148,511
Wastewater)		
Business-type Major Funds - Airport	Debt Service Fund	762,923

Transfers from the General Fund to the Non-Major Governmental Fund – Recreation were an operating subsidy as part of centralizing Park recreation programs all in the Recreation Fund. Transfers from the Non-Major Governmental Fund – Street Improvement Fund and from the General Fund were to fund capital projects such as streets, building renovations, equipment, and park improvements. Transfers from the Business-type Major Funds (Electric, Water, and Wastewater) to the Non-Major Governmental Fund – Street Improvement Fund were for bond savings costs related to the issuance of certificates of obligation, which fund street maintenance operations in the Street Improvements Fund. Transfers from Business-type Major Funds – Airport to the Debt Service Fund were to pay for Airport-related debt payments previously paid by property taxes.

F. Other Assets

In March 2010, the City issued Combination Tax & Electric Utility System Revenue Refunding Bonds, Series 2010 with a maturity of 15 years for prepaying certain contractual obligations to TMPA. The principal amount of the bonds was \$58,820,000 with a reoffering premium and other bond issuance costs of \$3,835,015 for a total of \$62,655,015. As the proceeds of this debt issuance were placed with Texas Municipal Power Agency (TMPA) and the City received an economic benefit over a period of years, an Other Asset was recorded in the Electric Fund Statement of Net Position in the amount of \$62,655,015. The City is amortizing the Other Asset over a period of 15 years with a half year convention the first and last years. See footnote V.E. for more information on TMPA.

In August 2014, the City issued General Obligation Refunding Bonds, Series 2014A with a maturity of 10 years for prepaying certain contractual obligations to TMPA. The principal amount of the bonds was \$11,570,000 with a reoffering premium and other bond issuance costs of \$1,848,651 for a total of \$13,418,651. As the proceeds of this debt issuance were placed with TMPA and the City received an economic benefit over a period of years, an Other Asset was recorded in the Electric Fund Statement of Net Position in the amount of \$13,418,651. The City is amortizing the Other Asset over a period of 10 years.

In August 2015, the City issued General Obligation Refunding Bonds, Series 2015A with a maturity of 9 years for prepaying certain contractual obligations to TMPA. The principal amount of the bonds was \$2,955,000 with a reoffering premium and other bond issuance costs of \$462,133 for a total of \$3,417,133. As the proceeds of this debt issuance were placed with TMPA and the City received an economic benefit over a period of years, an Other Asset was recorded in the Electric Fund Statement of Net Position in the amount of \$3,417,133. The City is amortizing the Other Asset over a period of 9 years.

In September 2017, the City impaired 37.9% of the of these Other Assets, for a total of \$26,930,415. This was due to TMPA closing its power generation operations to seasonal activities only. The impaired portion was recorded as a GASB 62 Regulatory Asset in Other Assets to be amortized over the existing timelines originally established, through mid-year of fiscal year 2025.

In June 2019, TMPA notified Electric Reliability Council of Texas (ERCOT) of the plan to move the generation plant, Gibbons Creek, to a status of decommissioned and retired. The official effective date was October 2019. In September 2019, the City impaired the remaining portion of the Other Asset. The remaining

impaired portion of the original Other Assets were recorded as a GASB 62 Regulatory Asset in Other Assets to also be amortized over the existing timelines originally established, through mid-year of fiscal year 2025.

In February 2021, the State of Texas experienced unprecedented freezing temperatures that put pressure on the availability of electric power (the "Weather Event"). Due to the high demand for power during this period and the limited availability of the power, the purchase price for power increased dramatically during this period. These energy price increases resulting in utilities, including the Electric Fund of the City of Denton, needing to access financial reserves to make payment to ERCOT for the power purchased necessary to service their customers. Due to the unparalleled dollar amount of the purchased power, the City of Denton issued \$140 million of commercial paper to provide temporary funding for immediate cash flow needs. In September 2021, the City issued \$141,990,000 of revenue refunding bonds to convert the outstanding commercial paper principal plus interest to debt to be paid over a period of 30 years. The Electric Fund recorded \$140,000,000 of this purchased power expense as a regulatory asset in Other Assets to be amortized over the period of 15 years, starting with fiscal year ending September 30, 2022.

To qualify to utilize GASB 62, the following must apply:

- The regulated business-type activity's rate for regulated services provided to its customers are established by or are subject to approval of
- an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.
- The regulated rates are designed to recover the specific regulated business-type activity's costs of providing the regulated services.

In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the regulated business-type activity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

The City of Denton qualifies to utilize GASB 62 due to:

- State and local statues empower the City of Denton City Council to establish retail rates.
- The City of Denton specific costs are recovered through City of Denton retail rates.
- Current and projected customer demand support the recovery of City of Denton cost of service.

For Internal Service funds, long-term liabilities are included as part of the above totals for governmental activities. Compensated absences payables and net pension liability balances and payments are based on the assignment of an employee within a fund. Other postemployment benefits are liquidated from the Health Insurance internal service fund, with the retiree subsidy amounts paid predominantly by the General Fund. Claims payable represents an estimate of self-insured claims liability outstanding in the Health Insurance and Risk Retention internal service funds as well as one possible litigation payable in the Electric Fund.

General Bonded Debt - General bonded debt at September 30, 2021, is comprised of the following:

· · · · · · · · · · · · · · · · · · ·	Total general bonded debt				\$395,774,762	\$ 308,521,855

[These amounts do not include net unamortized premiums/ (discounts) of \$22,123,885 nor net deferred gain/ (loss) on refunding of (\$638,821).]

Proceeds of general obligation bonded debt are restricted to the uses for which they were approved in the bond elections or, in the case of a refunding issuance, to the uses for which the certificates of obligation were originally issued. The City Charter expressly prohibits the use of bond proceeds to fund operating expenses. The general obligations are collateralized by the full faith and credit of the City and, primarily, payable from property taxes.

In December 2020, the City issued \$14,150,000 (\$12,735,000 of which is included as part of business-type activities) in general obligation refunding bonds. The reacquisition price fell below the net carrying amount of the old debt by \$340,776, (\$310,802 of which is reported as a deferred loss in business-type activities). This amount is being amortized over the remaining life of the refunded debt, which is the same as the life of

the new debt issued. The current refunding was undertaken to reduce total debt service payments over 11 years by \$3,624,333 and resulted in a net present value savings of \$3,444,385.

In July 2021, the City issued \$97,035,000 (\$72,300,000 of which is included as part of business-type activities) in certificates of obligation. The debt was issued to pay the costs of various capital improvements in the Capital Projects Fund (\$20,890,000), the Electric Fund (\$38,395,000), the Water Fund (\$17,255,000), the Wastewater Fund (\$16,650,000), the Fleet Fund (\$2,655,000), and the Customer Service Fund (\$1,190,000).

In July 2021, the City issued \$54,710,000 of general obligation refunding and improvement bonds. The bonds were issued to pay the costs of bond election capital improvements for streets and public safety facilities in the Capital Projects Fund.

On September 30, 2021, the City had no general obligation bonds or certificates of obligation considered defeased but still outstanding.

Business-type Revenue Bonds – Revenue bond debt at September 30, 2021, is comprised of the following issues:

						Gı	oss Amount
	Interest Rate			Or	iginal Amount	O	utstanding at
Revenue Bonds	(%)	Issue Date	Final Maturity		of Issue	Septe	ember 30, 2021
Utility system	3.25 to 5.0	2017	2037	\$	214,890,000	\$	199,340,000
Utility system Refunding	0.27 to 5.7	2021	2036		141,990,000		141,990,000
Total revenue bonds				\$	356,880,000	\$	341,330,000

[These amounts do not include net unamortized premiums/ (discounts) of \$20,982,363.]

The revenue bonds are collateralized by the revenue of the Denton utility system funds (System) and the related interest and sinking fund. The ordinance provides that the revenue of the System is to be used first to pay operating and maintenance expenses of the System and second to establish and maintain the revenue bond funds. Any remaining revenues may then be used for any lawful purpose. The ordinance also contains provisions, which among other items restrict the issuance of additional revenue bonds unless certain financial ratios are met. Management believes the City is in compliance with all significant requirements. The interest and sinking fund had a net position balance of \$10,607,945 as of September 30, 2021 and is restricted for debt service. On September 30, 2021, the City had no revenue bonds considered defeased but still outstanding. In September 2021, the City issued \$141,990,000 of revenue refunding bond debt, all in the Electric Fund. The debt was issued to refund outstanding commercial paper originally issued to cover energy purchase power from the February 2021 Texas winter weather event. The debt fully matures in 2036.

Business-type General Obligation Bonds and Certificates of Obligation – General obligation bonds and certificates of obligation issued for electric, water, wastewater, and solid waste funds at September 30, 2021, is comprised of the following:

	.						ross Amount

2026	8,225,000	1,525,100	17,375,000	13,361,313	13,900,000	25,295,282	39,500,000	40,181,695
2027-2031	30,270,000	2,663,250	95,955,000	54,660,447	78,605,000	126,495,486	204,830,000	183,819,183
2032-2036	-	-	91,860,000	34,987,944	97,540,000	126,491,747	189,400,000	161,479,691
2037-2041	-	-	80,750,000	21,156,225	42,185,000	54,193,669	122,935,000	75,349,894
2042-2046	-	-	67,480,000	7,774,875	28,565,000	36,115,451	96,045,000	43,890,326
2047-2051			17,735,000	855,275	33,420,000	36,112,836	51,155,000	36,968,111
Total	\$ 110,803,145	\$ 16,775,270	\$ 437,255,000	\$ 193,693,946	\$ 341,330,000	\$ 501,167,729	\$ 838,233,145	\$ 674,668,834

[These amounts do not include net unamortized premiums/ (discounts) of \$78,899,392 nor net deferred gain/ (loss) on refunding of (\$1,562,698).]

Bonds Authorized and Unissued

General obligation bonds authorized but unissued as of September 30, 2021 amounted to \$148,390,000. When issued, the proceeds will be allocated to the applicable street, drainage, police facilities, and parks projects.

All bonds were issued publicly through negotiated or competitive terms with no direct placements. There is no acceleration of maturity of the bonds in the event of default, and the City has never defaulted on the payment of bonds.

Claims and Judgements Payable

Claims and judgements payable include claims payables as part of the City's self-insurance plan, which can be found in note V.D. It also includes a judgement liability of \$4,000,000 recorded in the electric fund, which can be found in note V.G. for further information.

H. Landfill Closure and Post-Closure Cost

State and federal laws and regulations require the City to place a final cover on its Mayhill Road landfill site upon closure and to perform certain maintenance and monitoring functions at the site for thirty years after closure. Although closure and post-closure care costs will be paid only upon anticipated closure, the City reports a portion of these costs as an operating expense in each period based on landfill capacity used as of each balance sheet date. Based on an updated model created by a 2017 engineering study, total landfill closure and post-closure cost as of September 30, 2021 was \$23,442,770. The \$12,076,086 reported as landfill closure and post-closure care liability as of September 30, 2021 is a \$702,648 increase from the \$11,373,438 liability reported on September 30, 2020. This liability represents the cumulative amount incurred to date based on the use of 17.82% of the estimated capacity of the entire landfill at September 30, 2021. The change in estimated capacity decreased due to the remaining life increasing from updated Permit 1590B approval in August 2021.

Based on this estimate, the remaining potential estimated liability for closure and post-closure care of the entire landfill is \$11,366,684. The City will recognize the remaining estimated cost of closure and post-closure care as the remaining capacity is filled. These amounts are based on what it would cost to perform closure and post-closure care in 2021. Actual cost may fluctuate due to inflation, changes in technology, or changes in regulations. The landfill has a remaining life of 66 years, and the City expects to close the landfill in fiscal year 2087.

The solid waste fund has provided for a reservation and designation of cash and investments of \$11,992,859 at September 30, 2021 and anticipates increasing the reserve in future periods as the closure and post-closure activities are carried out.

I. Decommissioning Liability

The electric fund recorded in prior years a decommissioning liability that had a balance of \$21,167,124 as of September 30, 2020. This entire amount was payable to Texas Municipal Power Agency (TMPA) as the City's portion of TMPA's decommissioning liability for the Gibbons Creek power generation facility. In February 2021, the City paid TMPA \$6,037,368 toward this liability as part of TMPA's sale of the power generation facility. The remaining liability was transferred to the new owner as part of the sale and was written off and recognized in the financial statements as a non-operating revenue. See footnote V.E. on TMPA for more details.

V. OTHER INFORMATION

A. Pension Plans

Employee Retirement Plans

The City of Denton participates in two pension plans; Texas Municipal Retirement System (TMRS), an agent-multiple employer traditional, joint contributory, hybrid defined benefit pension plan; and the Denton Firemen's Relief and Retirement Fund (FRRF), a single employer, contributory, defined benefit plan. Both plans are described in detail below. Aggregate amounts for the two pension plans are as follows:

	TMRS	FRRF	Total
Pension liability	\$ 560,470,110	\$ 128,332,828	\$ 688,802,938
Pension assets	494,893,606	117,198,139	612,091,745
Net pension liability	\$ 65,576,504	\$ 11,134,689	\$ 76,711,193
Deferred outflows of resources	\$ 17,619,761	\$ 9,082,731	\$ 26,702,492
Deferred inflows of resources	13,072,602	8,877,079	21,949,681
Pension expense	13,033,962	712,532	13,746,494

Texas Municipal Retirement Plan

Plan Description

The City of Denton participates as one of 895 plans in the defined benefit cash-balance plan administered by the Texas Municipal Retirement System (TMRS). TMRS is statewide public retirement plan created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for employees of Texas participating cities. The TMRS Act places the general administration and management of the System with a six-member, Governor-appointed board of trustees; however, TMRS is not fiscally dependent on the State of Texas. TMRS issues a publicly-available annual comprehensive financial report obtainable at www.tmrs.com.

All eligible employees of the city are required to participate in TMRS.

Benefits Provided

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS.

At retirement, the employee's benefit is calculated based on the sum of the employee's contributions with interest, and the city-financed monetary credits with interest. Employees may choose to receive their retirement benefit in one of seven payments options. Employees may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the employee's deposits and interest.

Upon retirement, the employee's retirement benefits are calculated based on the sum of the employee's contributions, with interest, and the City-financed monetary credits, with interest. City-financed monetary credits are composed of three sources: prior service credits, current service credits, and updated service credits.

- Prior service credit, granted by each city joining TMRS, is a monetary credit equal to the accumulated value of the percentage of prior service credit selected by the City, multiplied by an employee's contributions that would have been made, based on the average salary prior to TMRS participation, for the number of months the employee was employed by the City before joining TMRS, accruing 3% annual interest and including the matching ratio adopted by the City.
- Current Service Credit is a monetary credit for service performed by an employee after the City joined TMRS and is based on a percent (200%) of the employee's total contributions and interest credits (commonly referred to as the City's matching ratio). Each participating city designates the rate the employee contributions (7% for the City) and interest is credited on contribution balances annually at a guaranteed minimum 5% rate. Any change in the matching ratio would be applied prospectively.
- Updated Service Credits (USC) is an optional monetary credit granted on an annually repeated basis by the City, and it may increase an employee's monthly retirement benefit. In calculating USC, TMRS looks at the changes in the employee's salary over their career and any changes the City has made to its TMRS plan, such as the employee contribution rate or the City's matching ratio. Although USC may increase the employee's retirement benefit, USC does not affect the amount of contributions in an employee's account or the amount an employee will receive if they refund.

The plan provisions also include an annually repeating basis cost of living adjustments for retires equal to 70% of the change in the consumer price index. If an employee terminates employment and refunds their account, the employee will receive their total contributions, plus credited interest. The employee will not receive any of the city-financed monetary credits. An employee can retire at ages 60 and above with 5 or more years of service or with 20 years of service regardless of age. A member is vested after five years.

Employees Covered by Benefit Terms

At the December 31, 2020 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	797
Inactive employees entitled to but not yet receiving benefits	693
Active employees	1,293
Total	2,783

Contributions

The contribution rates for employees in TMRS are either 5%, 6%, or 7% of employee gross earnings, and the city matching percentages are either 100%, 150%, or 200%, both as adopted by the City Council. Under the state law governing TMRS, the contribution rate for each city is determined annually by the actuary, using the Entry Age Normal (EAN) actuarial cost method. The City's contribution rate is based on the liabilities created from the benefit plan options selected by the City and any changes in benefits or actual experience over time.

Employees for the City were required to contribute 7% of their annual gross earnings during the fiscal year. The contribution rates for the City were 17.29% and 17.61% in calendar years 2020 and 2021, respectively. The City's contributions to TMRS for the year ended September 30, 2021 were \$17,794,920 and were equal to the required contributions.

Net Pension Liability

The City's Net Pension Liability (NPL) was measured as of December 31, 2020, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

Actuarial Assumptions

The Total Pension Liability in the December 31, 2020 actuarial valuation was determined using the following actuarial assumptions:

Inflation 2.5% per year Overall payroll growth 2.75% per year

Investment Rate of Return 6.75%, net of pension plan investment expense, including inflation

Salary increases were based on a service-related table. Mortality rates for active members are based on the PUB(10) mortality tables with the Public Safety table used for males and the General Employee table used for females. Mortality rates for healthy retirees and beneficiaries are based on the gender-distinct 2019 Municipal Retirees of Texas mortality tables. The rates for actives, healthy retirees and beneficiaries are projected on a fully generational basis by Scale UMP to account for future mortality improvements. For disabled annuitants, the same mortality tables for healthy retirees are used with a 4-year set-forward for males and a 3-year set-forward for females. In addition, a 3.5% and 3.0% minimum mortality rate is applied, for males and females respectively, to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by Scale UMP to account for future mortality improvements subject to the floor.

The actuarial assumptions were developed primarily from the actuarial investigation of the experience of TMRS over the four-year period from December 31, 2014 to December 31, 2018. They were adopted in 2019 and first used in the December 31, 2019 actuarial valuation. The post-retirement mortality assumption for healthy annuitants and Annuity Purchase Rate (APRs) are based on the Mortality Experience Investigation Study covering 2009 through 2011 and dated December 31, 2013. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income in order to satisfy the short-term and long-term funding needs of TMRS.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the

target asset allocation percentage and by adding expected inflation. In determining their best estimate of a recommended investment return assumption under the various alternative asset allocation portfolios, TMRS's actuary focused on the area between (1) arithmetic mean (aggressive) without an adjustment for time (conservative) and (2) the geometric mean (conservative) with an adjustment for time (aggressive). The target allocation and best estimates of real rates of return for each major asset class in fiscal year 2021 are summarized in the following table:

		Long-Term
		Expected Real
	Target	Rate of Return
Asset Class	Allocation	(Arithmetic)
Global Equity	30.0%	5.30%
Core Fixed Income	10.0%	1.25%
Non-Core Fixed Income	20.0%	4.14%
Real Return	10.0%	3.85%
Real Estate	10.0%	4.00%
Absolute Return	10.0%	3.48%
Private Equity	10.0%	7.75%
Total	100.0%	

Discount Rate

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

Changes in the Net Pension Liability

	Increase (Decrease)					
	Total Pension	Plan Fiduciary	Net Pension			
	Liability	Net Position	Liability			
	(a)	(b)	(a) - (b)			
Balance at 12/31/2019	\$ 530,227,521	\$ 460,593,810	\$ 69,633,711			
Changes for the year:						
Service cost	18,685,981	-	18,685,981			
Interest	35,523,156	-	35,523,156			
Change of benefit terms	-	-	-			
Difference between expected						
and actual experience	2,636,510	-	2,636,510			
Changes of assumptions	-	-	-			
Contributions - employer	-	18,613,464	(18,613,464)			
Contributions - employee	-	7,536,737	(7,536,737)			
Net investment income	-	34,987,709	(34,987,709)			
Benefit payments, including refunds						
of employee contributions	(26,603,058)	(26,603,058)	-			
Administrative expense	-	(226,230)	226,230			
Other changes		(8,826)	8,826			
Net changes	30,242,589	34,299,796	(4,057,207)			
Balance at 12/31/2020	\$ 560,470,110	\$ 494,893,606	\$ 65,576,504			

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the City, calculated using the discount rate of 6.75%, as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

	1% Decrease in	Current	1% Increase in
	Discount Rate	Discount Rate	Discount Rate
	(5.75%)	(6.75%)	(7.75%)
City's net pension liability	\$ 149,152,966	\$ 65,576,504	\$ (2,501,789)

Pension Plan Fiduciary Net Position

Detailed information about the pension plan's Fiduciary Net Position is available in the Schedule of Change in Fiduciary Net Position, by Participating City, separately-issued TMRS financial report. That report may be obtained on the Internet at www.tmrs.com.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended September 30, 2021, the City recognized pension expense of \$13,033,962. This amount is included as part of personal services expenses.

At September 30, 2021, the City reported deferred outflows of resources and deferred inflows of resources related to TMRS pension from the following sources:

	Deferred Outflows		Deferred Inflows		
	of Resources		0	f Resources	
Differences between projected and actual investment earnings	\$	-	\$	(13,072,602)	
Contributions subsequent to the measurement date		12,817,459		- -	
Differences between expected and					
actual economic experience		3,990,432		-	
Difference in assumption changes		811,870			
Total	\$	17,619,761	\$	(13,072,602)	

\$12,817,459 reported as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability for the City's fiscal year ending September 30, 2022. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense (income) as follows:

For the Year	Net Deferred
Ended September 30,	Outflows/(Inflows)
2022	\$ (2,914,526)
2023	1,747,532
2024	(6,692,325)
2025	(410,981)
2026	-
Total	\$ (8,270,300)

Denton Firemen's Relief and Retirement Plan

Plan Description

The City contributes to the retirement plan for firefighters in the Denton Fire Department known as the Denton Firemen's Relief and Retirement Fund (the Fund). The Fund is a single employer, contributory, defined benefit plan. The benefit provisions of the Fund are authorized by the Texas Local Fire Fighters' Retirement Act (TLFFRA). TLFFRA provides the authority and procedure to amend benefit provisions. The plan is administered by the Board of Trustees of the Denton Firemen's Relief and Retirement Fund. The City does not have access to nor can it utilize assets within the retirement plan trust. The Fund issues a stand-alone report pursuant to GASB Statement No. 67, which may be obtained by writing the Denton Firemen's Relief and Retirement Fund at P.O. Box 2375, Denton, Texas 76202. See that report for all information about the plan fiduciary net position.

Benefits Provided

Firefighters in the Denton Fire Department are covered by the Denton Firemen's Relief and Retirement Fund which provides service retirement, death, disability, and withdrawal benefits. These benefits fully vest after 20 years of credited service. Firefighters may retire at age 50 with 20 years of service. A partially-vested benefit is provided for firefighters who terminate employment with at least 10 but less than 20 years of service. If a terminated firefighter has a partially vested benefit, the firefighter may retire starting on the date they would have both completed 20 years of service if they had remained a Denton firefighter and attained age 50. The present plan effective January 1, 2011 provides a monthly normal service retirement benefit,

payable in a Joint and Two-Thirds to Spouse form of annuity, equal to 2.59% of Highest 36-Month Average Salary for each year of service.

A retiring firefighter who is at least age 52 with at least 22 years of service has the option to elect the Retroactive Deferred Retirement Option Plan (RETRO DROP) which will provide a lump sum benefit and a reduced monthly benefit. The reduced monthly benefit is based on the service and Highest 36-Month Average Salary as if the firefighter had terminated employment on their selected RETRO DROP benefit calculation date, which is no earlier than the later of the date the firefighter meets the age 52 and 22 years of service requirements and the date four years prior to the date the firefighter actually retires. Upon retirement, the employee will receive, in addition to the monthly retirement benefit, a lump sum equal to the sum of (1) the amount of monthly contributions the member has made to the Fund after the RETRO DROP benefit calculation date plus (2) the total of the monthly retirement benefits the member would have received between the RETRO DROP benefit calculation date and the date retired under the plan. There are no account balances. The lump sum is calculated at the time of retirement and distributed as soon as administratively possible.

There is no provision for automatic postretirement benefit increases. The Fund has the authority to provide, and has periodically in the past provided, ad hoc postretirement benefit increases.

Employees Covered by Benefit Terms

In the December 31, 2019 actuarial valuation, the following numbers of members were covered by the Fund:

Inactive employees or beneficiaries currently receiving benefits	87
Inactive employees entitled to but not yet receiving benefits	3
Active employees	199
Total	289

Contributions

The contribution provisions of the Fund are authorized by TLFFRA. TLFFRA provides the authority and procedure to change the amount of contributions determined as a percentage of pay by each firefighter and a percentage of payroll by the City.

The contribution policy of the Denton Firemen's Relief and Retirement Fund requires contributions equal to 12.6% of pay by the firefighters, the rate elected by the firefighters according to TLFFRA. The City began contributing in December 2017 according to a new City funding policy. The ordinance defining it includes an actuarially determined contribution rate over a closed 25-year amortization period, a contribution rate of 18.5% for several years, a minimum rate standard, and City review and approval of each actuarial valuation. The December 31, 2019 actuarial valuation includes the assumption the City contribution rate will be 18.5% over the unfunded liability amortization period. The costs of administering the plan are paid from the Fund assets. The City's contributions to the Fund for the year ended September 30, 2021 were \$4,158,368.

Ultimately, the funding policy also depends upon the total return of the Fund's assets, which varies from year to year. Investment policy decisions are established and maintained by the board of trustees. For the calendar year ending December 31, 2020, the money-weighted rate of return on pension plan investments was 11.80%. This measurement of the investment performance is net of investment-related expenses, reflecting the effect of the timing of the contributions received and the benefits paid during the year.

While the contribution requirements are not actuarially determined, state law requires that each change in plan benefits adopted by the Fund must first be approved by an eligible actuary, certifying the contribution commitment by the firefighters and the assumed city contribution rate together provide an adequate contribution arrangement. Using the entry age actuarial cost method, the plan's normal cost contribution rate is determined as a percentage of payroll. The excess of the total contribution rate over the normal cost contribution rate is used to amortize the plan's unfunded actuarial accrued liability (UAAL). The number of years needed to amortize the plan's UAAL is actuarially determined using an open, level percentage of payroll method.

Net Pension Liability

The City of Denton's net pension liability was measured as of December 31, 2020, and the total pension liability used to calculate the net pension liability was determined based on the actuarial valuation as of December 31, 2019 and rolled forward to December 31, 2020.

Total pension liability	\$ 128,332,828
Plan fiduciary net position	117,198,139
City's net pension liability	\$ 11,134,689
Plan fiduciary net position as a	
percentage of the total pension liability	91.3%

Actuarial Assumptions

The total pension liability in the December 31, 2019 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.50% per year
Overall payroll growth	3.00% per year, plus promotion, step and longevity increases that vary by
	service
Investment Rate of Return	6.75%, net of pension plan investment expense, including inflation

Mortality rates were based on the PubS-2010 (public safety) total dataset mortality tables employees and for retirees (sex distinct), projected for mortality improvement generationally using the projection scale MP-2019.

The long-term expected rate of return on pension plan investments is reviewed for each biennial actuarial valuation and was determined using a building-block method in which expected future net real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These components are combined to produce the long-term expected rate of return by weighting the expected future net real rates of return by the target asset allocation percentage (currently resulting in 4.96%) and by adding expected inflation (2.5%). In addition, the final 6.75% assumption was selected by "rounding down" and thereby reflects a reduction of 0.71% for adverse deviation. The target allocation and expected arithmetic net real rates of return for each major asset class are summarized in the following table:

		Long-Term
		Expected Real
	Target	Rate of Return
Asset Class	Allocation	(Arithmetic)
Equities	_	
Large Cap Domestic	40.0%	6.00%
Small/Mid Cap Domestic	10.0%	6.50%
International Developed	10.0%	6.50%
Alternatives		
Master Limited Partnerships	8.0%	6.50%
Real Estate	15.0%	4.50%
Fixed Income	10.0%	1.00%
Cash	7.0%	0.00%
Total	100.0%	
Weighted Average		4.96%

Discount Rate

The discount rate used to measure the total pension liability was 6.75%. No projection of cash flows was used to determine the discount rate because the December 31, 2019 actuarial valuation showed expected contributions would pay the normal cost and amortize the unfunded actuarial accrued liability (UAAL) in 18 years. Because of the 18-year amortization period of the UAAL, the pension plan's fiduciary net position is expected to be available to make all projected future benefit payments of current active and inactive members. Therefore, the long-term expected rate of return on pension plan investments of 6.75% was applied to all periods of projected benefit payments as the discount rate to determine the total pension liability.

Changes in the Net Pension Liability

	Increase (Decrease)				
	Total Pension Plan Fiduciary Net Pensi				
	Liability	Net Position	Liability		
	(a)	(b)	(a) - (b)		
Balance at 12/31/2019	\$ 121,442,365	\$ 103,815,795	\$ 17,626,570		
Changes for the year:					
Service cost	4,252,475	-	4,252,475		
Interest	8,293,527	-	8,293,527

Net investment income	-	12,313,949	(12,313,949)		
Benefit payments, including refunds					
of employee contributions	(5,655,539)	(5,655,539)	-		
Administrative expense		(116,909)	116,909		
Net changes	6,890,463	13,382,344	(6,491,881)		
Balance at 12/31/2020	\$ 128,332,828	\$ 117,198,139	\$ 11,134,689		

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability of the City of Denton, calculated using the discount rate of 6.75%, as well as what the city's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate:

	1% Decrease in	Current	1% Increase in
	Discount Rate	Discount Rate	Discount Rate
	(5.75%)	(6.75%)	(7.75%)
City's net pension liability	\$ 27,865,557	\$ 11,134,689	\$ (3,066,318)

Pension Plan Fiduciary Net Position

The plan fiduciary net position reported above is the same as reported by the Fund. Detailed information about the plan fiduciary net position is available in the Fund's separately issued audited financial statements, which are reported using the economic resources measurement focus and the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America. Revenues are recorded when earned, and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Investments are reported at fair value, the price that would be recognized to sell an asset in an orderly transaction between market participants at the measurement date.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended September 30, 2021, the City recognized pension expense of \$712,532. Amounts recognized in the fiscal year represent changes between the current and prior year measurement dates. This amount is included as part of personnel services expenses.

At September 30, 2021, the City reported deferred outflows of resources and deferred inflows of resources related to the Fund from the following sources:

	Deferred Outflows		Deferred Inflows		
	of	of Resources		Resources	
Differences between projected and actual investment earnings	\$	-	\$	(8,079,562)	
Contributions subsequent to the measurement date		3,058,198		-	
Differences between expected and					
actual economic experience		2,403,470		(797,517)	
Difference in assumption changes		3,621,063		_	
Total	\$	9,082,731	\$	(8,877,079)	

Deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date of \$3,058,198 will be recognized as a reduction of the net pension liability for the measurement year ending December 31, 2021 and the City's fiscal year ending September 30, 2022. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense (income) as follows:

For the Year	N	et Deferred
Ended September 30,	Outf	lows/(Inflows)
2022	\$	(1,668,518)
2023		(935,195)
2024		(2,135,562)
2025		(298,024)
2026		734,622
Thereafter		1,450,131
Total	\$	(2,852,546)

B. Post-employment Benefits Other than Pensions (OPEB)

The City of Denton provides for two post-employment benefit (OPEB) plans; one provides for post-employment medical care through a single-employer defined benefit medical plan (Medical OPEB), and the other is the Texas Municipal Retirement System Supplemental Death Benefits Fund (TMRS SDBF), a single-employer defined benefit OPEB plan. Both plans are described in detail following.

Aggregate amounts for the two OPEB plans are as follows:

	Medical OPEB		TMRS SDBF		Total	
Total OPEB liability	\$	48,918,032	\$	5,107,376	\$	54,025,408
Deferred outflows of resources	\$	6,986,692	\$	1,064,667	\$	8,051,359
Deferred inflows of resources		2,412,788		47,159		2,459,947
OPEB expense		4,535,096		561,765		5,096,861

Medical Benefits

Plan Description

The City of Denton provides post-employment medical care (OPEB) for retired employees through a single-employer defined benefit medical plan. The plan provides medical benefits for eligible retirees, their spouses and dependents though the City's group health insurance plans, which covers both active and retired members. The benefits, benefit levels, and contribution rates are recommended annually by the City management as part of the budget process. Any changes in rate subsidies for retirees are approved by the City Council. Since an irrevocable trust has not been established, the plan is not accounted for as a trust fund. The plan does not issue a separate financial report.

Benefits Provided

The City provides post-employment medical, dental, and vision care benefits to its retirees. To be eligible for benefits, an employee must qualify for retirement under the Texas Municipal Retirement System or the Denton Firemen's Relief and Retirement Plan. Retirees must make a one-time irrevocable decision to choose benefits at the time of retirement, after that their eligibility for the benefits ceases. However, retirees can move between plans and can add and drop dependents based on qualifying events.

All medical care benefits are provided through the City's self-insured health plan. The benefit levels are the same as those afforded to active employees.

Employees Covered by the Benefit Terms

In the December 31, 2020 actuarial valuation, the following number of employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	186
Active employees	1,492
Total	1.678

Funding Policy

The plan premium rates are recommended annually by City management and approved by the City Council as part of the annual budget. The retiree's contribution is the full amount of the actuarially determined blended premium rate less a subsidy dependent upon years of service at retirement. By providing retirees with access to the City's healthcare plans based on the same rates it charges to active employees, the City is in effect providing a subsidy to retirees. This implied subsidy exists because, on average, retiree health care costs are higher than active employee healthcare costs. By the City not contributing anything toward this plan in advance, the City employes a pay-as-you-go method through paying the higher rate for active employees each year. The City contributes \$40 per month for each five-year increment of service, up to \$200 per month, toward the cost of retiree coverage. The full cost for dental and vision is paid by the retiree. Retirees are required to enroll in Medicare Part B once eligible (age 65) and are moved into a fully-insured Medicare Supplement plan at that time. The same City contribution level applies to the supplement.

Medical OPEB Liability

The City's medical OPEB liability of \$48,918,032 was measured as of December 31, 2020, the same date as the actuarial valuation.

Actuarial Methods and Assumptions

The medical OPEB liability in the December 31, 2019 actuarial valuation was determined using the following actuarial assumptions and other inputs, applied to all periods included in the measurement date, unless otherwise specified.

Significant method and assumptions used for this fiscal year valuation were as follows:

Actuarial Assumptions

	12/31/2020
Valuation date	December 31, 2019
Actuarial cost method	Individual Entry-Age Normal Method
Discount Rate	3.71% as of December 31, 20182.75% as of December 31, 20192.00% as of December 31, 2020
Inflation rate	2.50% per annum
Projected salary increases	3.50% to 11.50% for TMRS, including inflation 3.00% to 9.18% for Fire, including inflation
Healthcare trend rates	Initial rate of 7.00% declining to an ultimate rate of 4.15% after 15 years
Mortality	TMRS: For healthy retirees, the gender-distinct 2019 Municipal Retirees of Texas mortality tables are used. The rates are projected on a fully generational basis using the ultimate mortality improvement rates in the MP tables to account for future mortality improvements.
	Firefighters: The gender-distinct PubS-2010 (safety employees) total data set mortality are used. The rates are projected on a fully generational basis using the projection scale MP-2019.
Participation Rates	60% for employees retiring at age 65 or older; 45% for employees retiring between the ages of 50 and 64; 5% for employees retiring between the ages of 45 and 49; 0% for retirees under age 50 at retirement

Changes in the Medical OPEB Liability

	Total Medical
	OPEB Liability
Balance at 12/31/2019	\$ 42,548,138
Changes for the year:	
Service cost	2,884,792
Interest	1,186,428
Difference between expected and actual experience	329,072
Changes of assumptions	3,664,984
Benefit payments	(1,695,382)
Net changes	6,369,894
Balance at 12/31/2020	\$ 48,918,032

Total OPEB liability as a percentage of covered payroll was 37.36%.

Sensitivity of the Medical OPEB Liability to Changes in the Discount Rate

The following schedule shows the impact of the medical OPEB liability if the discount rate used was 1% less than (1.00%) and 1% greater than (2.00%) the discount rate that was used (3.00%) in measuring the medical OPEB liability:

	Current		
	1% Decrease	Discount Rate	1% Increase
	(1.00%)	(2.00%)	(3.00%)
Total medical OPEB liability	\$ 54,419,045	\$ 48,918,032	\$ 44,110,560

Sensitivity of the Medical OPEB Liability to Changes in the Healthcare Cost Trend Rate Assumption

The following schedule shows the impact of the medical OPEB liability if the healthcare trend cost rate used was 1% less than (6.00%) and 1% more than (8.00%) the healthcare cost trend rate that was used (7.00%) in measuring the medical OPEB liability:

	Current Healthcare		
	1% Decrease	Cost Trend Rate	1% Increase
	(6.00%)	(7.00%)	(8.00%)
Total medical OPEB liability	\$ 44,497,589	\$ 48,918,032	\$ 54,207,624

Medical OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Medical OPEB

For the year ended September 30, 2021, the City recognized medical OPEB expense of \$4,535,096. At September 30, 2021, the City reported deferred outflows of resources and deferred inflows of resources related to medical OPEB from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
Differences between expected and actual economic experience	\$	291,982	\$	1,265,008
Changes in actuarial assumptions		5,510,107		1,147,780
Contributions subsequent to the measurement date		1,184,603		<u>-</u>
Totals	\$	6,986,692	\$	2,412,788

Deferred outflows of resources related to OPEB contributions subsequent to the measurement date of \$1,184,603 will be recognized as a reduction of the medical OPEB liability for the City's fiscal year ending September 30, 2022. Other amounts reported as deferred outflows of resources related to the medical OPEB will be recognized in OPEB expense as follows:

Year Ending September 30,	 t Deferred ows/(Inflows)
2022	\$ 463,876
2023	463,876
2024	463,876
2025	463,876
2026	456,083
Thereafter	1,077,714
Total	\$ 3,389,301

TMRS Supplemental Death Benefit Fund

Plan Description

The City of Denton voluntarily participates in the Texas Municipal Retirement System Supplemental Death Benefits Fund (TMRS SDBF). The SDBF is a defined benefit group-term life insurance Other Postemployment Benefit (OPEB) plan as defined by GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. No assets are accumulated in a trust that meets the criteria in paragraph 4 of GASB Statement No. 75. It is established and administered in accordance with the TMRS Act identically to the City's pension plan.

Benefits Provided

The SDBF provides group-term life insurance to City employees who are active members in TMRS, including or not including retirees. The City Council opted into this system via an ordinance, and may terminate coverage under, and discontinue participation in, the SDBF by adopting an ordinance before November 1st of any year to be effective the following January 1st.

Payments from this fund are similar to group-term life insurance benefits, and are paid to the designated beneficiaries upon the receipt of an approved application for payment. The death benefit for active employees provides a lump-sum payment approximately equal to the employee's annual salary (calculated based on the employee's actual earnings for the 12-month period preceding the month of death). The death benefit for retirees is considered an "other postemployment benefit" (OPEB) and is a fixed amount of \$7,500. As the SDBF covers both active and retiree participants with no segregation of assets, the SDBF is considered to be an unfunded OPEB plan.

Employees Covered by the Benefit Terms

In the December 31, 2020 actuarial valuation, the following number of employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	627
Inactive employees entitled to but not yet receiving benefits	196
Active employees	1,293
Total	2,116

Contributions

The City contributes to the SDBF at a contractually required rate as determined by an annual actuarial valuation, which was 0.18% for 2021 and 0.17% for 2020, of which 0.08% for 2021 and 0.03% for 2020, represented the retiree-only portion for each year, as a percentage of annual covered payroll. The rate is equal to the cost of providing one-year term life insurance. The funding policy for the SDBF program is to assure that adequate resources are available to meet all the death benefit payments for the upcoming year; the intent is not to prefund retiree term life insurance during employees' entire careers. The City's contribution to the SDBF for two years ended September 30, 2021 and 2020 were \$179,918 and \$175,649 respectively, representing contributions for both active and retiree coverage, which equaled the required contribution each year.

Actuarial Methods and Assumptions

The SDBF OPEB liability in the December 31, 2020 actuarial valuation was determined using the following actuarial assumptions:

	12/31/2020
Inflation rate	2.50% per annum
Discount rate	2.00%
Actuarial cost method	Entry Age Normal Method
Projected salary increases	3.50% to 11.5% including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the following:

Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct 2019 Municipal Retirees of Texas mortality tables. The rates are projected on a fully generational basis by scale UMP to account for future mortality improvements. For disabled annuitants, the gender-distinct 2019 Municipal Retirees of Texas mortality tables are used with a 4-year set forward for males and a 3-year set forward for females. In addition, a 3.5% and 3% minimum mortality rate is applied to reflect the impairment for younger members who became disabled for males and females, respectively. The rates are projected on a fully generational basis by scale UMP BB to account for the future mortality improvements subject to the floor. Administrative expenses for the SDBF are paid through the TMRS Pension Trust Fund and are wholly accounted for under the provisions of GASB Statement No. 68.

Changes in assumptions reflect the annual change in the municipal bond rate. The actuarial assumptions used in the December 31, 2020 valuation were based on the results of an actuarial experience study for the period December 31, 2014 to December 31, 2018.

Discount Rate

The SDBF program is treated as an unfunded OPEB plan because the SDBF trust covers both actives and retirees and the assets are not segregated for these groups. As such, a single discount rate of 2.00% was used to measure the SDBF OPEB Liability. Because the plan is essentially a "pay-as-you-go" plan, the single discount rate is equal to the prevailing municipal bond rate. The source of the municipal bond rate was fixed-

income municipal bonds with 20 years to maturity that include only federally tax-exempt municipal bonds as reported in Fidelity Index's "20-year Municipal GO AA Index" as of December 31, 2020.

Sensitivity of the SDBF OPEB Liability to Changes in the Discount Rate

The following schedule shows the impact of the SDBF OPEB liability if the discount rate used was 1% less than (1.00%) and 1% greater than (2.00%) the discount rate that was used (3.00%) in measuring the medical OPEB liability:

				Current		
	1%	Decrease	Dis	scount Rate	19	6 Increase
		(1.00%)		(2.00%)		(3.00%)
Total SDBF OPEB liability	\$	6,333,727	\$	5,107,376	\$	4,176,622

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources Related to OPEBs

At September 30, 2021 the City reported a liability of \$5,107,376 for its Total SDBF OPEB liability. The total SDBF liability was determined by an actuarial valuation as of December 31, 2020. For the year ended September 30, 2021, the City recognized SDBF OPEB expense of \$561,765. There were no changes of benefit terms that affected measurement of the Total SDBF Liability during the measurement period.

Changes in the SDBF OPEB Liability

	Total SDBF	
	OP	EB Liability
Balance at 12/31/2019	\$	4,095,402
Changes for the year:		
Service cost		236,668
Interest	115,434	
Difference between expected		
and actual experience		(28,782)
Changes of assumptions		720,927
Benefit payments		(32,273)
Net changes		1,011,974
Balance at 12/31/2020	\$	5,107,376

Total OPEB liability as a percentage of covered payroll was 4.75%.

At September 30, 2021, the City reported deferred outflows of resources and deferred inflows of resources related to other SDBF post-employment benefits from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources	
Differences between expected and				
actual economic experience	\$	(213,389)	\$	(78,844)
Changes in actuarial assumptions		1,147,043		126,003
Contributions subsequent to the				
measurement date		131,013		
Totals	\$	1,064,667	\$	47,159

The \$131,013 reported as deferred outflows of resources related to SDBF OPEB resulting from contributions subsequent to the measurement date will be recognized as a reduction of the Total SDBF Liability for the year ending September 30, 2022. Other amounts reported as deferred outflows of resources related to SDBF OPEB will be recognized in OPEB expense as follows:

Year Ending	Ne	t Deferred
September 30	Outflo	ows/(Inflows)
2022	\$	209,663
2023		209,663
2024		169,747
2025		176,352
2026		114,215
Thereafter		6,855
Total	\$	886,495

C. Deferred Compensation Plan

The City offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. For the calendar years 2020 and 2021, the plan, available to all permanent City employees, permitted them to defer, until future years, up to \$19,500, respectively. Employees who are age 50 or older may contribute an additional amount of \$6,500, the total not to exceed \$26,000 in 2021. Employees who are within three years of retirement eligibility may elect to participate in a catch-up provision allowed by Section 457, which has an annual maximum contribution amount of \$39,000 in 2021 and 2020. The withdrawal of deferred compensation funds is only available to employees by loan, termination, retirement, death, or unforeseeable emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property or rights are, until paid or made available to the employee or other beneficiary, solely the property and rights of the employees. Accordingly, the assets and associated liability of the plan are not included in the City's financial statements.

It is the opinion of the City's legal counsel that the City has no liability for losses under the plan.

D. Self-insurance Plan

The City has established a self-insurance plan for liability and workers' compensation claims in the Risk Retention Fund. Accrued claims payable include provisions for claims reported and claims incurred but not reported. The provision for reported claims is determined by estimating the amount which will ultimately be paid for each claimant. The provision for claims incurred but not yet reported is estimated based on actuarial studies.

It is the policy of the City of Denton not to purchase commercial insurance for workers' compensation claims or general liability. Commercial liability insurance coverage is purchased for airport operations, emergency medical services, take-home vehicles, and employee theft and dishonesty. Additionally, excess insurance is purchased for general liability, auto liability, public officials, and workers' compensation exposures. The City reports liabilities when it is probable that a loss has occurred, and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Because actual claim liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount.

In January 2008, the City started a self-insured group employee health insurance plan. Claims are paid from the Health Insurance Fund, which has an annually negotiated stop loss provision.

The City's costs associated with the self-insurance plans are interfund transactions. Accordingly, they are treated as operating revenues of the Internal Service Risk Retention Fund and Health Insurance Fund and operating expenditures (expenses) of the other funds and employee payroll deductions.

Claims liabilities are re-evaluated periodically to take into consideration settlement of claims, new claims and other factors. As of September 30, 2021, the estimated value of these liabilities was \$5,759,295. Changes in balances of claims liabilities during fiscal years 2021 and 2020 were as shown as follows:

	Claims Liability Beginning of Fiscal Year		C	laims and Change in Estimates	-	Claims Payments	Claims Liability End of Fiscal Year		
Workers'						•			
Compensation									
2021	\$	2,230,084	\$	1,332,855	\$	992,266	\$	2,570,673	
2020		2,035,824		1,311,288		1,117,028		2,230,084	
General Liability 2021 2020	\$	949,594 720,136	\$	486,452 488,684	\$	209,457 259,226	\$	1,226,589 949,594	
Health Insurance									
2021	\$	1,914,115	\$ 2	21,127,066	\$	21,079,148	\$	1,962,033	
2020		1,838,331	2	22,845,423		22,769,639		1,914,115	

On September 30, 2021, the City of Denton had a negative unrestricted net position of \$3,131,650 in the Risk Retention Fund and an additional negative net position of \$3,071,038 in the Health Insurance Fund for payment of claims, both in addition to the liability balances recorded. There were no significant reductions in insurance coverage from coverage in the prior year, and the amount of settlements did not exceed insurance coverage in the current year or in any of the past three fiscal years.

E. Commitments and Contingencies

Agreement with TMPA

In 1976, the City, along with the cities of Bryan, Greenville, and Garland, Texas (the Cities) entered into a Power Sales Contract with the Texas Municipal Power Agency (TMPA). TMPA was created through concurrent ordinances of the Cities and is governed by a Board of Directors consisting of eight members, two appointed by the governing body of each city. Under the terms of the agreement, TMPA agreed to construct or acquire electric generating plants to supply energy and power to the Cities for a period of not less than 35 years. The Cities in turn agreed to purchase all future power and energy requirements in excess of the amounts generated by their systems from TMPA at prices intended to cover operating costs and retirement of debt. In the event that revenues were insufficient to cover all costs and retire the outstanding debt, each of the cities guaranteed a portion of the unpaid debt based, generally, upon the pro rata share.

TMPA, a municipal corporation, is governed by a Board of Directors consisting of eight members. The governing body of each of the four Cities appoints two members to the Board. An affirmative vote of five Directors, plus a weighted majority vote based on the respective energy usage of the Cities, is required for major decisions.

The City pays TMPA a pro-rated monthly charge based on the City's contractual portion of TMPA's annual fixed operating costs and debt service payments, which is currently 21.3%. As of September 30, 2021, total TMPA long-term debt outstanding was approximately \$206,713,000, all of which was transmission debt and has no effect on the term of the contract. All outstanding generation debt was paid off on September 1, 2018.

Effective September 1, 2016, TMPA and the Member Cities entered into a Joint Operating Agreement (JOA). In general, the purposes of the JOA include: (i) funding TMPA operations such as mine reclamation, transmission service, and plant decommissioning following expiration of the Power Sales Contract (PSC); (ii) subject to certain exceptions, requiring Member City approval for the issuance of new debt, the execution of certain significant contracts, and the sale of property exceeding \$10 million in value; (iii) specifying provisions for determining how costs of TMPA and proceeds from the sale of assets are to be allocated among the Member Cities; (iv) providing for the establishment by TMPA of reserve funds for the decommissioning of the plant and the indemnification of TMPA Board Members and Member City officials, employees, contractors, and agents; and (v) dividing the operations of TMPA into three business functions (mine, generation, and transmission) and requiring separate budgets and books for each business function.

The PSC provides upon dissolution of TMPA, the assets of TMPA automatically being transferred to the Member Cities, with each Member City receiving an undivided interest in the assets of TMPA in proportion to the amount paid by the Member City to TMPA. The JOA requires TMPA to periodically make this calculation for each business unit and sets out formulas for making these calculations. Under the JOA, these ownership calculations are relevant not only to the allocation of assets upon dissolution of TMPA, but also to the allocation of certain proceeds from the sale of assets, and in some cases, the allocation of TMPA costs.

At the request of a majority of the Member Cities, TMPA is required by the JOA to transfer a divided interest in the transmission system to each Member City. Under this partition process, the objective is for each City to receive ownership of transmission facilities in the vicinity of the Member City, and in proportion to the Member City's ownership interest in the transmission business. Any such transfer of transmission assets must be in compliance with relevant bond covenants, including those requiring defeasance of all or a portion of transmission debt.

The JOA included a reclamation plan for the mine, required the development of a decommissioning plan, and set out standards for environmental remediation. TMPA is required to comply with these plans and standards.

Under the JOA, in discharging its contractual obligations, including mine reclamation, decommissioning, transmission service, environmental remediation, indemnification, and other obligations, TMPA is rendering services to the Member Cities. The JOA obligates each Member City to pay the cost of these services, and to collect rates and charges for electric service sufficient to enable it to pay to TMPA all amounts due under the

JOA for these services. The City's payment obligations under the JOA are payable exclusively from such electric utility revenues and constitute an operating expense of the electric system.

Unless terminated earlier through the mutual consent of all parties, the JOA remains in effect until the dissolution of TMPA and the winding up of its affairs.

Effective September 1, 2016, the JOA was amended (Amendment No. 1). The primary purposes of the amendment were to authorize the sale of Gibbons Creek and the sale of the Southern 345 kV Transmission System and to authorize the issuance of refunding bonds in connection with such sales. As the sale contemplated by Amendment No. 1 did not occur, by its own terms, Amendment No. 1 ceased to have any force or effect. Effective September 22, 2017, the JOA was amended a second time (Amendment No. 2). The purposes of this amendment are to: continue TMPA's authority to issue mine reclamation bonds as had been contemplated in Amendment No. 1; revise the dates on which the separate budgets of the JOA become effective; authorize TMPA to sell certain mining and transmission assets, provided the sales do not exceed in value certain financial thresholds, and provided the sales comply with bond covenants; and allow for an extension to the term of the PSC, applicable only to the cities notifying TMPA of the extension, in order to complete a period of seasonal operation in 2018, or such other period of time as desired by the notifying cities. Pursuant to this provision, the City extended the PSC from September 1, 2018 to September 30, 2018, in order to complete the period of 2018 seasonal operation. As of September 30, 2018, the PSC had expired for all member cities.

On September 17, 2019 the JOA was amended (Amendment No. 3). The amendment defined portions specific to the generation business that had been tied to the expired PSC and clarified all board members may vote on matters involving decommissioning and the sale of the plant. It exempted financial commitments related to bonding from the requirement to obtain approval of all Member Cities relating to certain budget increases. This is to address concerns by the Attorney General of Texas that a potential situation could arise where a Member City could interfere with TMPA's existing bond deposit requirement obligations ("bond reserve equivalent") should that obligation require a 20% increase over the previous year's budget. The amendment also allows for the sale of mine tracts only after the completion of mine reclamation. This would permit the sale of a mine tract subject to bonding provided that the conveyance reserves easements, leases, or other property rights are reserved to enable TMPA to complete reclamation.

On November 12, 2019 the JOA was amended (Amendment No. 4). This amendment modified the agreement to make it unambiguous that in the event that all mining assets are sold, all Member Cities shall remain responsible for the costs of closing the mining operation according to each's percentage share and that these are included: "all obligations are discharged with respect to mine reclamation bonds, surety bonds, banking agreements, letters of credit, and other financial commitments related to providing financial security or assurance for TMPA's mine reclamation responsibilities." Additionally, it modified the agreement by removing the cap on sales of the mining assets and allowed for the sale of the mine as a whole.

Effective September 26, 2017, Gibbons Creek transitioned into a seasonal operations mode, operating during the summer months only (May-September). Due to the significant decline in service utility of the generation assets, such assets were deemed largely impaired as of September 30, 2017. On June 1, 2019, the TMPA Board of Directors voted to permanently retire the generation facility. The City also wholly impaired its TMPA prepaid purchase power due to the retirement and had a remaining balance recorded of \$19,784,143 in Other Assets in the Electric fund to be amortized over the remaining 3.5 remaining years. See note IV.F. for more information.

In 2019, TMPA issued a request for proposal involving only the sale of generation assets. Proposals were received in August 2019, and TMPA entered into negotiations with one of the proposers. On December 10, 2020, the TMPA Board of Directors approved a fully negotiated Asset Purchase Agreement (APA) with Gibbons Creek Environmental Redevelopment Group LLC (GCERG). As required by the TMPA Joint Operating Agreement, each TMPA member city was required to approve the APA. On January 26, 2021, the City Council approved the APA with GCERG. On February 10, 2021, TMPA and GCERG closed on the sale of the Gibbons Creek Steam Generation Plant and property. Through the sale, GCERG acquired 6,200 acres

including the plant, CCR (coal combustion residuals) units, and reservoir. GCERG must decommission the plant and remediate all CCR units to TCEQ/EPA standards. GCERG provides independent financial security to TMPA for remediation/decommissioning and post closure activities and certain land use limits imposed on CCR containing parcels. The City's Electric fund had a liability recorded for TMPA's decommissioning obligation of \$21,167,124 as of September 30, 2020. As part of the sale of Gibbons Creek, the City paid \$6,037,368 of this liability in February 2021. The remaining liability of \$15,129,756 was recognized as a gain in other non-operating revenues. This sale to GCERG only includes the generation assets and TMPA retained the approximate 11,000 acres associated with the mine land and all transmission assets.

On July 15, 2021 the TMPA Board of Directors authorized the Gibbons Creek Lignite Mine with approximately 11,000 acres to be sold. The sale finalized in December 2021, subsequent to the current fiscal year-end. The City received its portion of the sale in the amount of \$15,174,089 which was recorded as revenues in the Electric fund for the fiscal year ending September 30, 2022. Following the closing, TMPA will continue to conduct mine reclamation activities pursuant to a reclamation easement that will remain in effect until all bonded areas are released from bond.

Selected financial statement information of TMPA is as follows:

	September 30			
	(Unaudited)			
	2021 2020			
	(000s)	(000s)

Power Purchase Agreements

Following is a list of power purchase agreements in effect as of the publication date of these financial statements. The information provided is all that is allowed under the confidentiality provision(s) of the particular agreements.

Denton Power, Landfill-Gas Combustor - In 2008, the City entered into a 16-year power purchase agreement with Denton Power, LLC. Under the agreement, the City purchases 1.6 MW of output from a landfill gas-fired electric generating facility located at the City's landfill. This contract was terminated in September 2020 when the City purchased the assets of Denton Power, LLC.

NextEra - In 2009, the City entered into a power purchase agreement for firm energy and associated renewable energy credits with NextEra Energy Power Marketing, LLC.

Santa Rita, Wind - In 2016, the City entered into a 20-year power purchase agreement for wind energy, capacity, and environmental attributes with Santa Rita Wind Energy, LLC.

NextEra - In 2015, the City entered into a 20-year power purchase agreement with Bluebell Solar Energy, LLC, a subsidiary of NextEra Energy, Inc. Under the agreement, the City purchases solar energy, capacity, and environmental attributes commencing from the commercial operation date which was November 2018.

Engie - In 2018, the City entered into a 15-year power purchase agreement with Engie Long Draw Solar, LLC. Under the agreement, which is scheduled to end June 2035, the City will purchase 75 MW of solar generation and environmental attributes. The in-service date was December 29, 2020.

NextEra - In 2018, the City entered into a 15-year power purchase agreement with Bluebell Solar II Energy, LLC, a subsidiary of NextEra Energy, Inc. Under the agreement, the City will purchase 100 MW of solar generation and environmental attributes. Commercial operation was achieved on December 28, 2020.

Samson Solar - In 2018, City of Denton entered into a 15-year power purchase agreement with Samson Solar Energy, LLC. Under the agreement, which is scheduled to end in 2037, the city will purchase 75 MW of solar generation and environmental attributes. The project has been impacted by a series of Force Majeure events, one of which is continuing. Currently the City has no projected in-service date.

Encumbrances

As discussed in note I.D., Budgetary information, encumbrances are utilized to the extent necessary to assure effective budgetary control and accountability and to facilitate effective cash planning and control. At year end the amount of encumbrances in governmental funds expected to be honored upon performance by the vendor in the next year were as follows:

General Fund	\$ 1,540,858
Capital Projects Fund	40,044,150
Nonmajor Governmental Funds	 1,553,632
Total	\$ 43,138,640

F. Tax Abatements

The City enters into economic development incentive agreements with entities to promote development and redevelopment within the City, stimulate commercial activity, generate additional sales tax, and enhance the property tax base and economic vitality of the City. Some agreements provide for an abatement of property taxes, while others provide for a rebate of a portion of sales and use tax or a portion of ad valorem (property) tax, as established per the agreements. The incentives are performance-based, and the City generally expects to receive increased revenue as a result of the agreements. These incentive agreements require approval by a City Council ordinance and are authorized under Chapter 312 (Property Redevelopment and Tax Abatement Act) of the Texas Tax Code and Chapter 380 of the Texas Local Government Code.

Property Tax Abatements

Tax abatements under Chapter 312 of the Texas Tax Code allow the City to designate tax reinvestment zones and negotiate tax abatement agreements with applicants. In 1990, the City Council adopted a resolution setting guidelines and criteria for granting abatements in the reinvestment zones which specifically notes incentives are limited to companies which create new wealth and do not adversely affect existing businesses operating within the City. The City is required to renew/adopt a Tax Abatement Policy every two years in accordance with Chapter 312 of the Texas Tax Code. The last policy was adopted in March of 2020. The abatement agreements authorize the appraisal districts to reduce the assessed value of the taxpayer's property by a percentage specified in the agreement, and the taxpayer will pay taxes on the lower assessed value during the term of the agreement. For the fiscal year ended September 30, 2021, the City abated property taxes totaling \$276,377 under this program, as detailed in the following agreements:

- Peterbilt In 2016, a 70% tax abatement agreement for a term of eight years was granted to Peterbilt Motors on new capital investments, including the construction of a new stand-alone 102,000 square foot building. The abatement amount for the current fiscal year was \$245,041.
- West Gate Business Park (WGBP) In 2016, a 60% tax abatement agreement for a term of ten years was granted to WGBP on new capital investments only to include Buildings 2 and 3 in the business

park. WGBP could receive an additional 10% abatement for the location of a supplier to an existing primary industry and/or an additional 5% for the location of a national headquarters for a total abatement of up to 75%. In the event of a failure to meet the conditions of the agreement, an increased assessed value of real property of at least \$3 million, the agreement provides for a full refund of all abatements previously granted plus interest. The abatement amount for the current fiscal year was \$31,336.

The City has an additional abatement agreement not listed above becoming effective in future fiscal years should the grantee meet the obligations of the agreement. The agreement is for Tyson Sales and Distribution.

Chapter 380 Agreements

The City Council has the authority under Chapter 380 of the Texas Local Government Code to grant or loan City funds in order to accomplish specific economic development goals. These incentives are considered on a case-by-case basis. The City has target industry sectors for recruitment that will be given priority consideration: aviation/aerospace, advanced manufacturing, renewable energy, research and development, information technology, supply chain for existing primary employers, and significant consumers of municipal utilities. Consideration may also be given for projects causing infill redevelopment or other desirable development objectives and/or any other activity which the City Council determines meets a specific public purpose for economic development.

Each agreement is based on the contribution in sales, property, and/or hotel tax. For the fiscal year ended September 30, 2021, the City rebated sales taxes totaling \$2,574,245, property taxes totaling \$733,095 (\$197,336 of which was paid out of the Westpark TIRZ No. Two), and hotel occupancy taxes totaling \$587,476 as detailed in the following agreements:

- Unicorn Lake In 2004, an agreement was approved for Unicorn Lake, an urban-style mixed-use development. The grantee receives one-third of the City sales tax, or 0.5%, generated by the project for a maximum of fifteen years as reimbursement for public improvement costs related to the project not to exceed \$6,664,901 plus accrued interest. The tax rebates initiated in 2010 and will terminate in 2024. The tax rebate amount for the current fiscal year was \$51,353.
- Rayzor Ranch In 2007, an agreement was approved for the Rayzor Ranch mixed-use development. The 410-acre project will have over one million square feet of retail and will be built in two phases. The agreement provides a sales tax reimbursement of one half of the City sales tax, or 0.75%, generated by the project for public improvement costs, which include the widening of a state highway bisecting the project. The grantee will receive a maximum of \$20 million over a 15 year term for phase one and a maximum of \$48 million over a term of 20 years for phase two. An additional 15% of the City sales tax, or 0.225%, was added to both phases to offset the hotel and convention center costs until \$5 million is reached. As of the current fiscal year, the tax rebate amount for phase one was \$1,394,054 and the tax rebate amount for phase two was \$842,124.
- Golden Triangle Mall In 2011, an agreement was approved for a major renovation of the Golden Triangle Mall. A threshold of a minimum \$45 to \$65 million was required as an investment into the property to receive a one-half share of the sales tax resulting from the renovations, less a monthly mall baseline amount established at \$95,898. The total grant payments may not exceed 15.83% of the required investment. GTM Development has invested \$49.5 million in the development. Tenant investments in the property amounted to \$8.8 million, for a total invest of \$58.3 million. Based on this total investment the total grant payment should not exceed \$9.2 million. The tax rebates initiated in 2016 and will terminate in 2035. The tax rebate amount for the current fiscal year was \$0.00. Due to the pandemic several stores closed, which resulted in no rebate qualification for fiscal year 2020-2021.
- Mayday Manufacturing In 2012, an agreement was approved for Mayday Manufacturing/Tailwind Technologies for the relocation of the business and expansion of a manufacturing facility. The

agreement provides a 75% tax rebate on the increment of property tax revenue generated above the base valuation for a period of ten years. In the event of a failure to meet the conditions of the agreement, an increased assessed value of real property of at least \$3 million, the agreement provides for a 50% refund of all rebates previously granted. The tax rebate amount for the current fiscal year was \$40,649.

- West Gate Business Park In 2015, an agreement was approved for West Gate Business Park (WGBP) for industrial development and provided for a 70% rebate of increased City property tax revenue generated for a period of ten years. WGBP includes three multi-tenant buildings totaling 413,000 square feet of new industrial/manufacturing space in the City. In 2016 the agreement was amended to include a 70% rebate on Building 1 improvements and to add a one-time grant payment in the amount of \$50,000. The tax rebate amount for the current fiscal year was \$31,336.
- WinCo Foods In 2015, an agreement was approved for WinCo Foods for a \$135 million, 800,000 square foot distribution facility expected to create 165 jobs with an annual payroll of around \$7.2 million. In the event of a failure to meet the conditions of the agreement, the agreement provides for a 20-50% refund of all rebates previously granted, depending on the timing of a failure. WinCo received reimbursement for infrastructure financing from Water and Wastewater funds and a local sales and use tax grant for the construction and equipping of the facility in prior fiscal years, completing those portions of the agreement. The active portion of the agreement provides for the following:
 - A grant equal to 100% of the incremental property tax generated by the property and paid into the Tax Increment Fund by both the City and the County, paid annually until the full reimbursement of the project costs for public improvements is reached. The tax rebate amount out of the Westpark TIRZ No. Two for the current fiscal year was \$197,336, with \$142,890 being the City portion of the tax rebate and \$54,446 being the County portion of the tax rebate.
 - A grant equal to 60% of City property taxes attributable to improvements resulting in an increase of assessed value of real property improvements and tangible personal property, paid annually until full reimbursement of the project costs for public improvements is reached. Once this full reimbursement is reached, the 60% property tax rebate will continue for a period of four years as long as the increase in investment in improvements is \$50 million excluding purchase price of the property. The tax rebate amount for the current fiscal year was \$268,910.
- O'Reilly Hotel Partners Denton In 2015, an agreement was approved for O'Reilly Hotel Partners Denton for a convention center with a hotel and restaurant located in the Rayzor Ranch Town Center. The agreement includes a 100% rebate of the property tax (excluding land, inventory, vehicles, and supplies), hotel occupancy tax, and sales tax generated by the project. The term is for a maximum of 25 years or a combined principal (\$28 million) and interest (\$26 million) amount of \$54 million is reached, whichever comes first. The agreement also includes 100% rebate of the construction sales tax up to \$850,000, then 50% thereafter. The construction sales tax rebate portion of the agreement was completed in fiscal year 2018. In the event of a failure to meet the conditions of the agreement, the agreement provides for a 100% refund of all rebates granted in the previous year. The sales tax, property tax, and hotel occupancy tax rebate amounts for the current fiscal year were \$29,214, \$190,145, and \$587,476, respectively.
- Buc-ee's Travel Center In 2015, an agreement was approved for Buc-ee's Travel Center. The agreement provides a sales tax reimbursement of one half of the City sales tax, or 0.75%, generated

from businesses located within the property boundaries for a five-year period. At the conclusion of the sales tax reimbursement term, the City has agreed to a one-time cash grant payment of \$2 million minus the total sales tax previously reimbursed, only if the grantee has not received a full \$2 million in sales tax reimbursements. In addition, at the end of the sales tax reimbursement term, the agreement provides a sales tax reimbursement infrastructure grant of one half of the City sales tax, or 0.75%, generated by the Buc-ee's Travel Center and developed outparcels that contain sit-down restaurants or retail establishments for a period of twenty years. The City has also agreed to pay the grantee one quarter of the City sales tax, or 0.375%, generated by outparcels not included in the previously mentioned infrastructure grant, including fast food restaurants and drive-through uses. The tax rebate amount for the current fiscal year was \$257,500.

The City has one additional Chapter 380 agreement not listed above becoming effective in future fiscal years should the grantee meet the obligations of the agreement. The agreement is for United States Cold Storage.

G. Litigation

Various claims and lawsuits are pending against the City. In accordance with GAAP, those judgments considered "probable" are accrued (see case below), while those claims and judgments considered "reasonably possible" are disclosed but not accrued. In the opinion of City management and legal counsel, the maximum amount of all significant claims considered reasonably possible, excluding condemnation proceedings and the item described following, is approximately \$500,000 as of September 30, 2021. Potential losses after insurance coverage on all probable claims and lawsuits will not have a material effect on the City's financial position as of September 30, 2021.

Michael Grim and Jim Maynard v. City of Denton

This case is a whistleblower retaliation lawsuit that was tried before a Dallas County jury. After a lengthy trial, involving disputed issues of law that were properly preserved for appeal, the jury awarded roughly \$4.0 million in damages to the two plaintiffs, and the City has filed an appeal. Plaintiffs alleged that their terminations were in retaliation for their report to the City Attorney of an individual City Council member's release of proprietary vendor data to the press. The City's position was that Plaintiffs were actually fired at will for lying to management about their participation in hunting and fishing trips with the vendors who ultimately won the bids on a city project. Based on the current jury judgment, the City has accrued the \$4 million as a long-term liability in the Electric fund, even though the trial court's final judgment reduced the jury verdict to \$2.7 million by the application of statutory caps on damages. It is possible that the judgment may be reversed or modified on appeal.

H. Subsequent Events

The City has evaluated all events or transactions that occurred after September 30, 2021 up through March 30, 2022, the date the financial statements were issued.

As presented in footnote V.E., the TMPA Board of Directors authorized the Gibbons Creek Lignite Mine with approximately 11,000 acres to be sold. The sale finalized in December 2021, subsequent to the current fiscal year-end. The City received its portion of the sale in the amount of \$15,174,089 which was recorded as revenues in the Electric fund for the fiscal year ending September 30, 2022.

I. New Accounting Pronouncements

The Governmental Accounting Standards Board (GASB) issued the following statement which became effective for the fiscal year ending September 30, 2021.

Statement No. 84 "Fiduciary Activities" – This Statement improves guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. The focus is generally on whether a government is controlling the assets of the fiduciary activity and on the beneficiaries with whom a fiduciary relationship exists. As a result of the

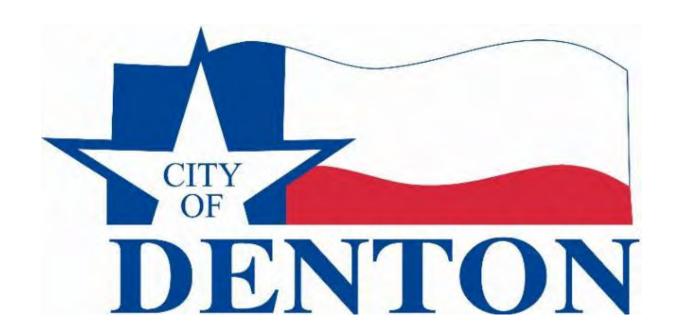

implementation of this statement, funds previously reported as agency funds are now reported as part of the General Fund.

The following statements for the GASB are effective for future fiscal years ending as listed below. The City is in the process of reviewing and evaluating these statements and their potential impact on the City's financial statements.

Statement No. 87 "Leases" – This Statement is to improve the accounting and financial reporting for leases by governments by requiring recognition of certain lease assets and liabilities previously classified as operating leases. It establishes a single model for lease accounting based on the principle that leases are financing the right to use an underlying asset. Under this Statement, a lessee is required to recognize a lease liability and an intangible right-to-use lease asset, and a lessor is required to recognize a lease receivable and a deferred inflow of resources, enhancing the relevance and consistency of information about leasing activities. This Statement will become effective for the City in fiscal year 2022.

Statement No. 91 "Conduit Debt Obligations" – This Statement clarifies the existing definition of conduit debt obligations (CDO) and establishes the CDO as not a liability of the issuer. Under this statement, it establishes the accounting and financial reporting of additional commitments and voluntary commitments extended by the issuers and arrangements associated with CDOs. This Statement will become effective for the City in fiscal year 2023.

Statement No. 93 "Replacement of Interbank Offered Rate" – This Statement provides exceptions for certain hedging derivate instruments when an interbank offered rate (IBOR) and clarifies the hedge accounting termination provisions. This Statement will become effective for the City in fiscal year 2022.

Notes to Schedule:

Actuarial determined contribution rates are calculated as of December 31st and become effective in January, 13 months later. Contributions above do not include contributions into the supplemental death benefit fund.

Methods and assumptions used to determine contribution rate for 2021:

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	25 Years (Equivalent Single Amortization Period of 14.6 years)
Asset Valuation Method	10 Year Smoothed Market; 12% Soft Corridor
Inflation	2.50%
Salary Increases	3.50% to 11.50% including inflation
Investment Rate of Return	6.75%
Retirement Age	Experience-based table of rates that are specific to the City's plan of benefits. Last updated for the 2019 valuation pursuant to an experience study of the period 2014 - 2018.
Mortality	Post-retirement: 2019 Municipal Retiress of Texas Mortality Tables. The rates are projected on a fully generational basis with scale UMP.
	Pre-retirement: PUB(10) mortality tables, with the Public Safety table used for males and the General Employees table used for females. The rates are projected on a fully generational basis with scale UMP.
Other	There were not benefit changes during the year

Notes to Schedule:

Annual required contributions are not actuarially determined. In accordance with city ordinance since 2017, the City has contributed to the Firemen's Relief and Retirement Fund at the rate of 18.5%, the assumed actuarial valuation rate over the unfunded liability amortization period.

While the contribution requirements are not actuarially determined, state law requires an actuary certify the assumed City contribution rate is adequate. Methods and assumptions used to contribution adequacy in the December 31, 2019 actuarial valuation:

Actuarial Cost Method	Entry Age
Amortization Method	Level Perc

Amortization Method Level Percentage of Payroll, Open

Remaining Amortization Period 17.3 Years
Asset Valuation Method 5-year smoothing
Inflation 2.50%

Salary Increases 3.00% annual general compensation increase plus promotion, step, and longevity

increases which average 1.98% per year over a 30-year career

Investment Rate of Return 6.75%, net of pension plan investment expense, including inflation

Retirement Age Average expected age at retirement of 57

Mortality PubS-2010 (public safety) total dataset mortality tables for employees and for retirees

(sec distinct), projected for morality improvement generationally using the projection

scale MP-2019

¹Schedule is intended to present information for ten years. Additional years of information will be presented as they become available.

Methods and assumptions used to determine contribution rate for 2021:

•	
Actuarial cost method	Individual Entry-Age Normal
Discount rate	2.00% (Based on the Fidelity Index's "20-Year Municipal GO AA Index" rates as of December 31, 2020.) The prior year discount rate was 2.75%.
Inflation rate	2.50%
Projected salary increases	3.5% to $11.5%$ for TMRS and $3.00%$ to $9.18%$ for Fire, including inflation
Demographic assumptions	Based on the experience study covering the four-year period ending December 31, 2018 as conducted for the Texas Municipal Retirement System (TMRS) and the assumptions used in the December 31, 2019 actuarial valuation for the Denton Firemen's Relief and Retirement Fund.
Healthcare trend rates Mortality	Initial rate of 7.00% declining to an ultimate rate of 4.15% after 15 years. TMRS: For healthy retirees, the gender-distinct 2019 Municipal Retirees of Texas mortality tables are used. The rates are projected on a fully generational basis using the ultimate mortality improvement rates in the MP tables to account for future mortality improvements.
	<u>Fire</u> : For healthy retirees, the gender-distinct PubS-2010 (safety employees) total data set mortality tables are used. The rates are projected on a fully generational basis using the project scale MP-2019.
Participation rates	60% for employees retiring at age 65 or older;
	45% for employees retiring between the ages of 50 and 64; 5% for employees retiring between the ages of 45 and 49;
	0% for employees retiring before the ages of 45.

²There are no assets accumlated in a trust that meets the criteria in Paragraph 4 of GASB Statement No. 75 to pay related benefits.

Adjustments - Budgetary Basis are pass-through debt service payments budgeted as transfers in from enterprise and internal service funds. Other Financing Sources (Uses) related to refunding are adjusted out as they are non-budgeted items reducing future debt service payments.

NONMAJOR GOVERNMENTAL FUNDS

SPECIAL REVENUE FUNDS

Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.

Community Development Block Grant (CDBG) – to account for the operations of projects utilizing Community Development Block Grant Funds. Such revenues are restricted to expenditures for specified projects by the Department of Housing and Urban Development.

Recreation – to account for the revenues and expenditures for the recreation programs that are self-supporting. All expenditures will be reimbursed 100%. Various business operations, such as concessions, fall into this account.

Criminal Justice – to account for revenue received from the State of Texas Criminal Justice Division and other grants administered by the police department.

Police Confiscation – to account for revenues received from confiscated goods. Expenditures are restricted to enhancing law enforcement.

Tourist and Convention – to account for taxes received from hotel and motel occupancy for the purpose of promoting tourism.

Street Improvement – to account for street maintenance and improvement activities.

Gas Well Revenues – to account for the receipt of royalty, pooling, tax, and lease revenue related to park gas wells.

Citizens' Park Trusts – to account for several small trust funds that are for park development.

All Other – to account for miscellaneous special revenue sources that are required to finance specific activities.

INTERNAL SERVICE FUNDS

Internal Service Funds account for the financing of goods or services provided by one department for another.

The City has the following Internal Service Funds:

Materials Management Fund – to account for the financing of goods and services provided by the Materials Management operations of purchasing and warehouse to other City departments. Purchasing is responsible for procuring goods and services for City departments, and the warehouse maintains an inventory of materials and supplies used by City departments. Warehouse items are billed to other departments.

Fleet Services Fund – to account for the financing of goods and services provided by the Municipal Garage and Machine Shop to other City departments. Municipal Garage and Machine Shop billings include cost of parts and labor and administrative charges. Actual costs include depreciation on the building, improvements, machinery, and equipment used to provide the service.

Health Insurance Fund – to account for the accumulation of resources for the self-insurance activities of the City for employee medical insurance as well as other employee insurance benefits including long-term disability, short-term disability, dental insurance, and vision insurance.

Risk Retention Fund – to account for the accumulation of resources for the payment of activities associated with providing general liability insurance coverage and self-funded activities for City operations.

Technology Services Fund – to account for the accumulation of resources to provide computer services such as programming, support, training, maintenance, and office services to City departments.

Engineering Services Fund – to account for providing engineering, real estate, public works inspection, and development review services primarily to internal City departments although some services are provided to external entities.

Customer Service Fund – to account for providing customer service activities to residents and businesses for City departments. Services include bill pay, utility service requests, connect/disconnect services, maintenance of customer accounts, utility billing, operator calls, collections, accounts receivable, and cash handling.

Facilities Fund – to account for the maintenance of all city-owned facilities and vertical construction projects.

STATISTICAL SECTION

This part of the City of Denton's annual comprehensive financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the city's overall financial health.

Contents

Financial Trends

These schedules contain trend information to help the reader understand how the city's financial performance and well-being have changed over time. (Tables 1-4)

Revenue Capacity

These schedules contain information to help the reader assess the city's most significant local revenue source, the property tax. These tables do not include the Electric fund information due to confidentiality of information necessary for competitive rates. (Tables 5-8)

Debt Capacity

These schedules present information to help the reader assess the affordability of the city's current level of outstanding debt and the city's ability to issue additional debt in the future. (Tables 9 - 12)

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which the city's financial activities take place. (Tables 13 - 14)

Operating Information

These schedules contain service and infrastructure data to help the reader understand how the information in the city's financial report relates to the services the city provides and the activities it performs. (Tables 15 - 17)

Sources: Unless otherwise noted, the information in these schedules is derived from the annual comprehensive financial reports for the relevant year.

Source: data.texas.gov

Note: Overlapping governments are those that coincide, at least in part, with the geographic boundaries of the city. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents and businesses of the City of Denton. This process recognizes that, when considering the City of Denton's ability to issue and repay long-term debt, the entire debt burden borne by the residents and businesses should be taken into account. However, this does not imply that every taxpayer is a resident, and therefore responsible for repaying the debt, of each overlapping government.

¹The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of the overlapping government's taxable assessed value that is within the City of Denton's boundaries and dividing it by the overlapping government's total taxable assessed value.

					(concluded)

¹The City did less route and seal of the concrete pavement and more clean and seal of asphalt pavement during the year. The drop in # of cutouts and crack seal maintenance was due to resources beign allocated to other projects and programs.

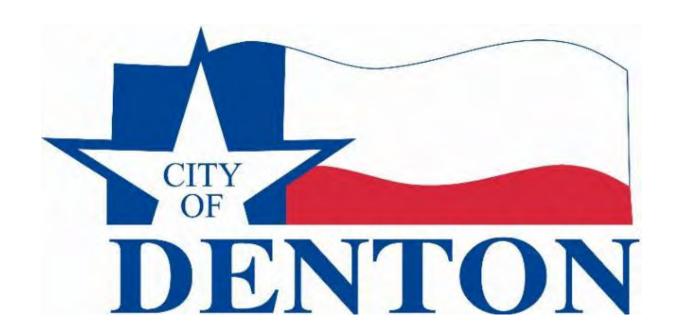

²These numbers were impacted from the COVID19 pandemic. The Water Park did not open during this year.
